

Praktikum TCC pertemuan 4

KARENA ERROR, JADI PAKAI CARA YANG LAIN

Windows+r, ketik netplwiz akan muncul seperti ini :

Klik add

How will this person sign in?

What email address would this person like to use to sign in to Windows? (If you know the email address they use to sign in to Microsoft services, enter it here.)

[Sign up for a new email address](#)

This person can sign in to easily get their online email, photos, files, and settings (like browser history and favorites) on all of their devices. They can manage their synced settings at any time.

[Privacy statement](#)

[Sign in without a Microsoft account \(not recommended\)](#)

Pilih without

Add a user

There are two options for signing in:

Microsoft account

Signing in to PCs with your email address lets you:

- Download apps from Windows Store.
- Get your online content in Microsoft apps automatically.
- Sync settings online to make PCs look and feel the same—like your browser history, account picture, and color.

Local account

Signing in with a local account means:

- You have to create a user name and account for each PC you use.
- You'll need a Microsoft account to download apps, but you can set it up later.
- Your settings won't be synced across the PCs that you use.
