File Sharing

File sharing dengan SAMBA (windows)

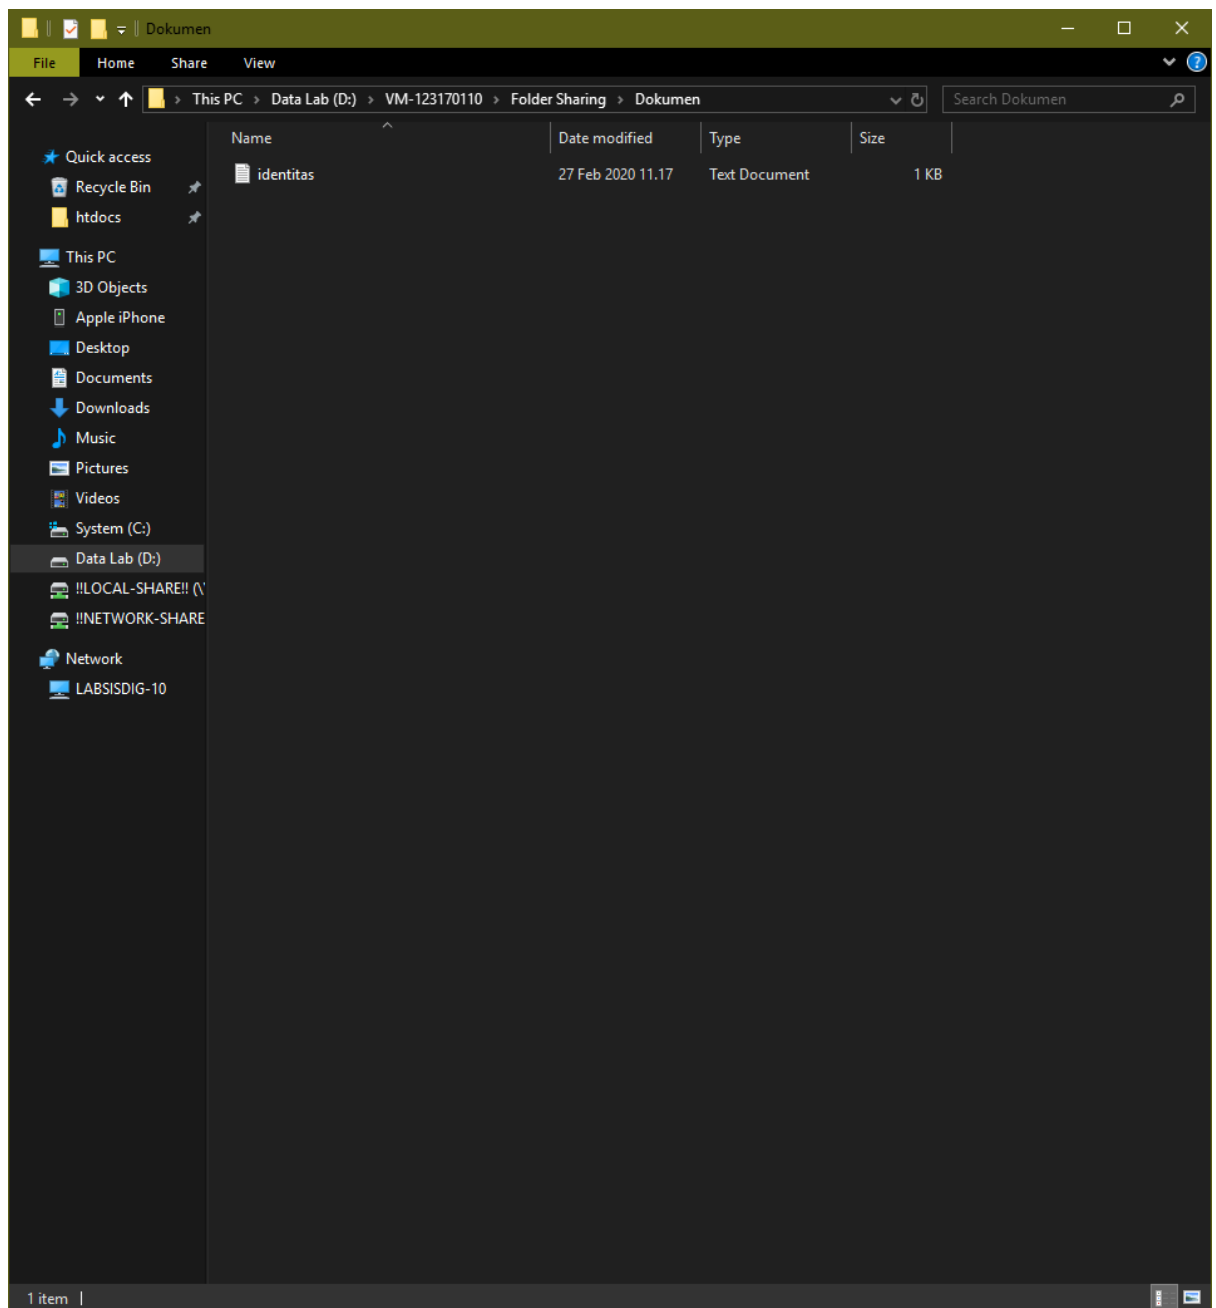

1. Buat Folder baru dengan nama “folder sharing” (di data D, folder “VM-123170110”)

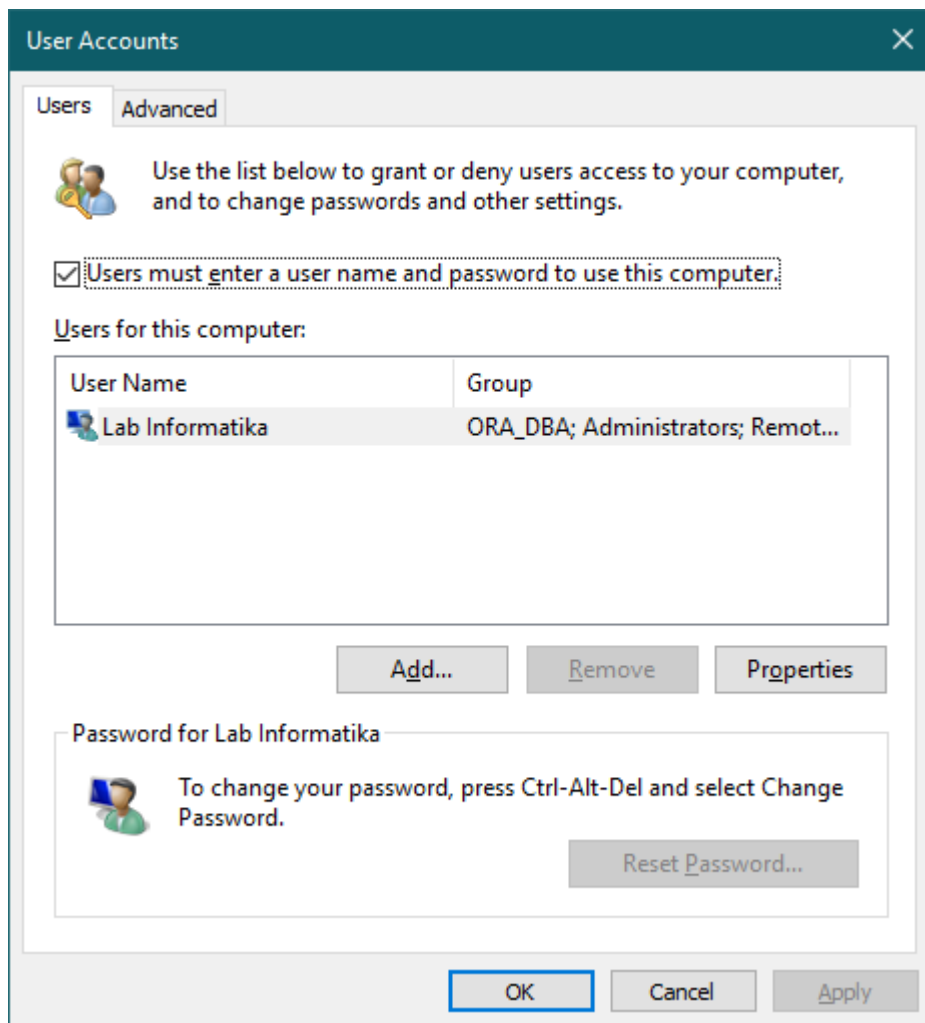

2. Buat 4 folder baru dengan nama : Aplikasi, Dokumen, Foto, Games, Video

3. Bikin notepad file namanya "identitas" di file "dokumen" kayak gini.

4. Bikin user acc ga online, cari run trs ketik netplwiz

5. Klik add, pilih yang local account gt pokoknya, trs ketik ini. Username : fura, pass : 123170110

Add a user

Choose a password that will be easy for you to remember but hard for others to guess. If you forget, we'll show the hint.

User name

fura

Password

••••••••

Reenter password

••••••••

Password hint

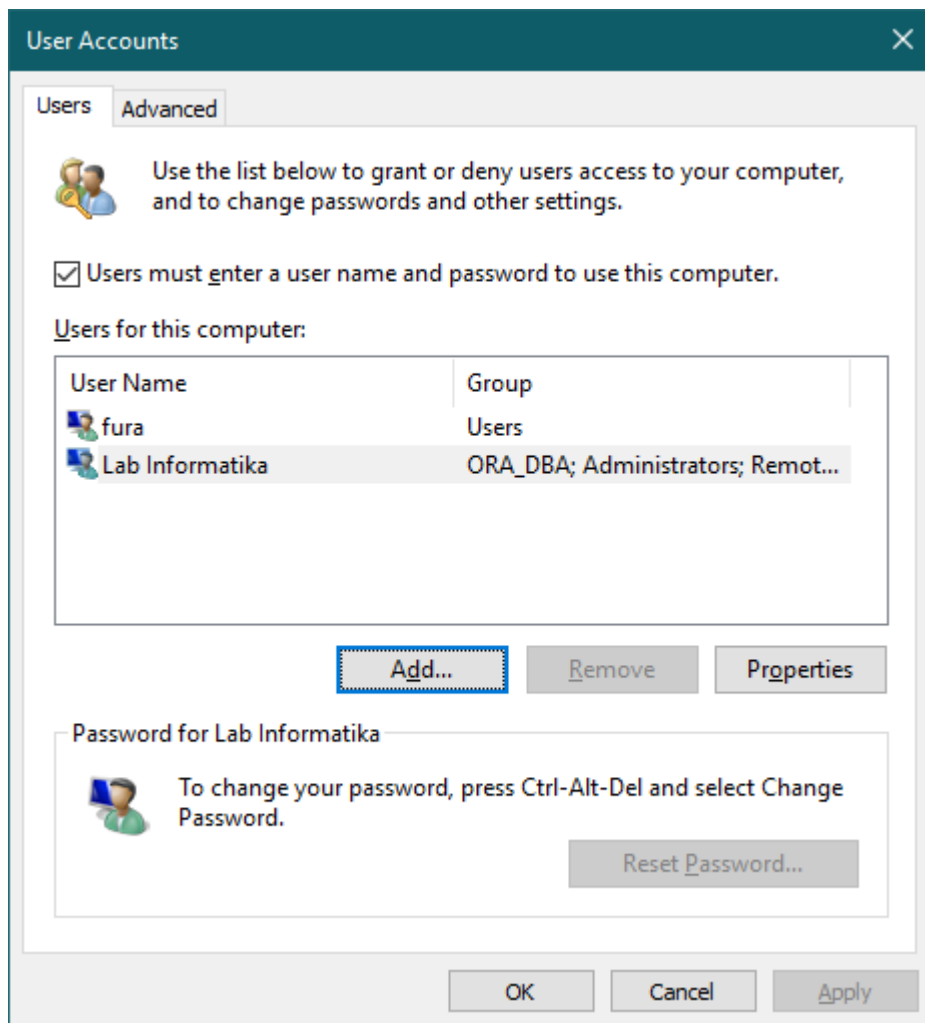

nim fura

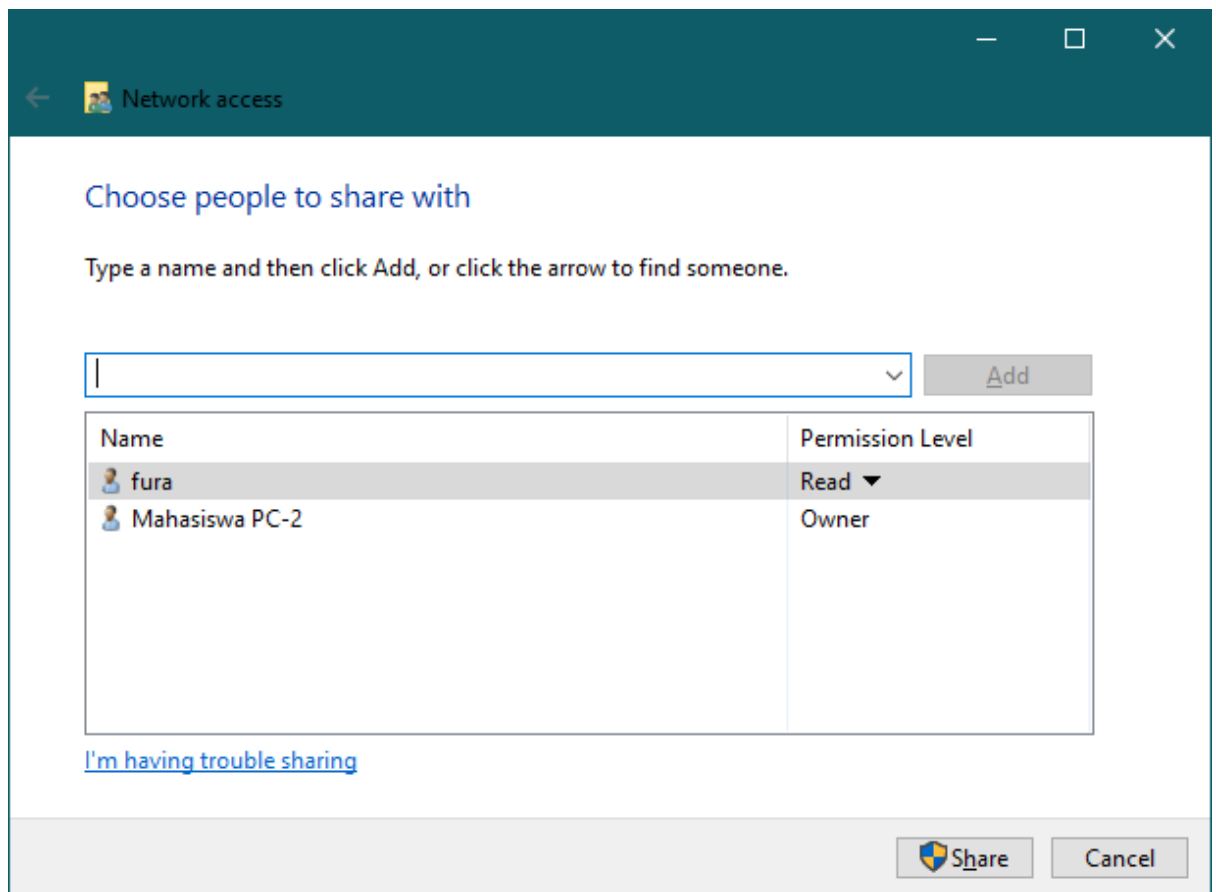

Next

Cancel

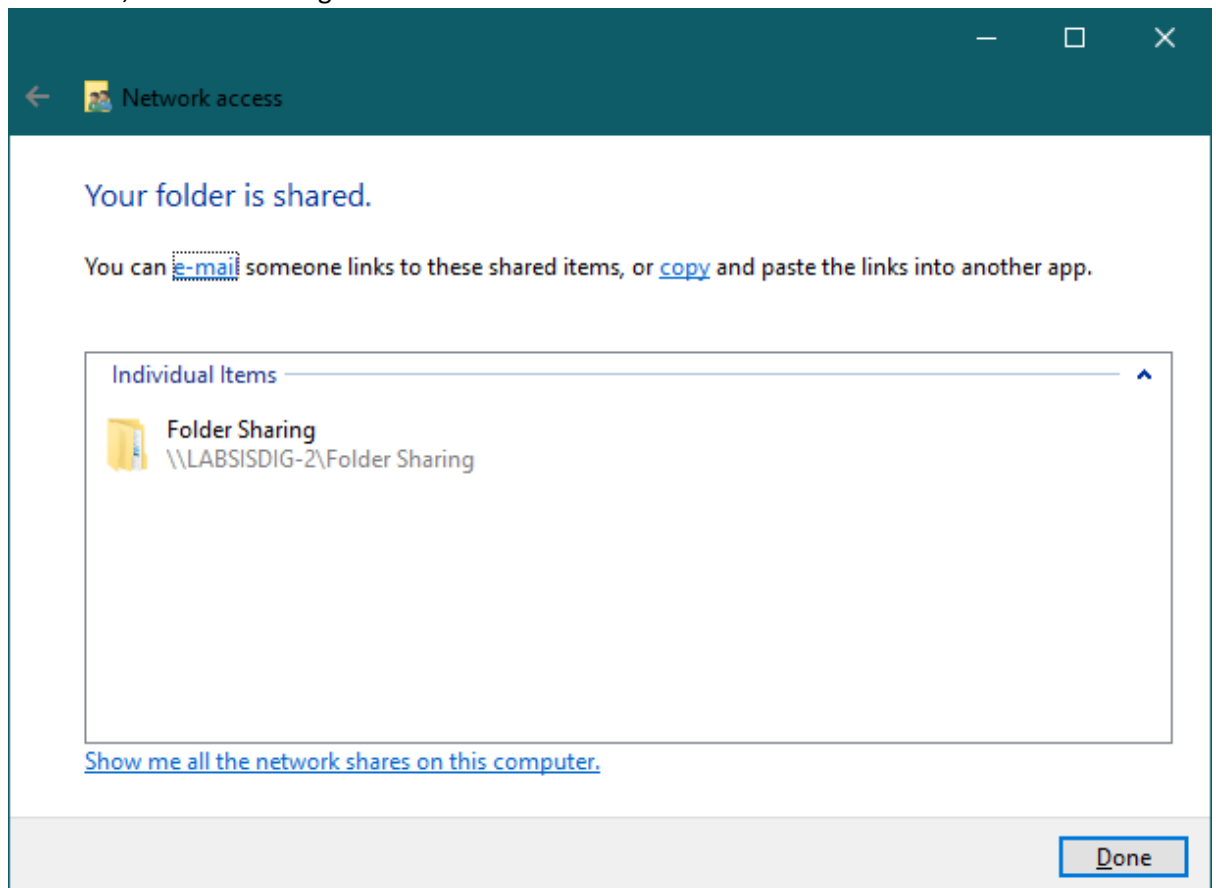

6. Kalo sudah, ketik saja finish trs muncul deh akun ku.

7. Di folder sharing > klik kanan > give access to > specific people > cari fura > add

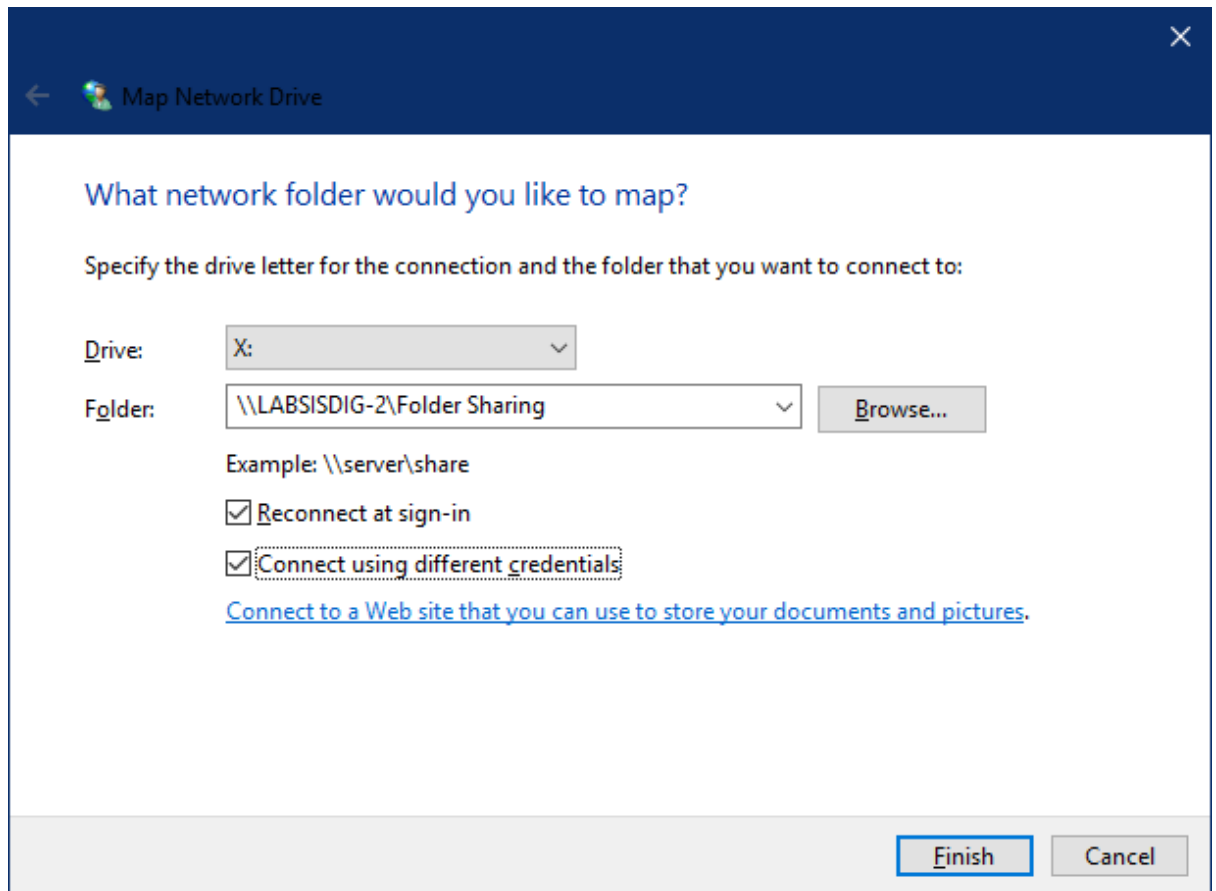

- Klik share, trs muncul kek gini.

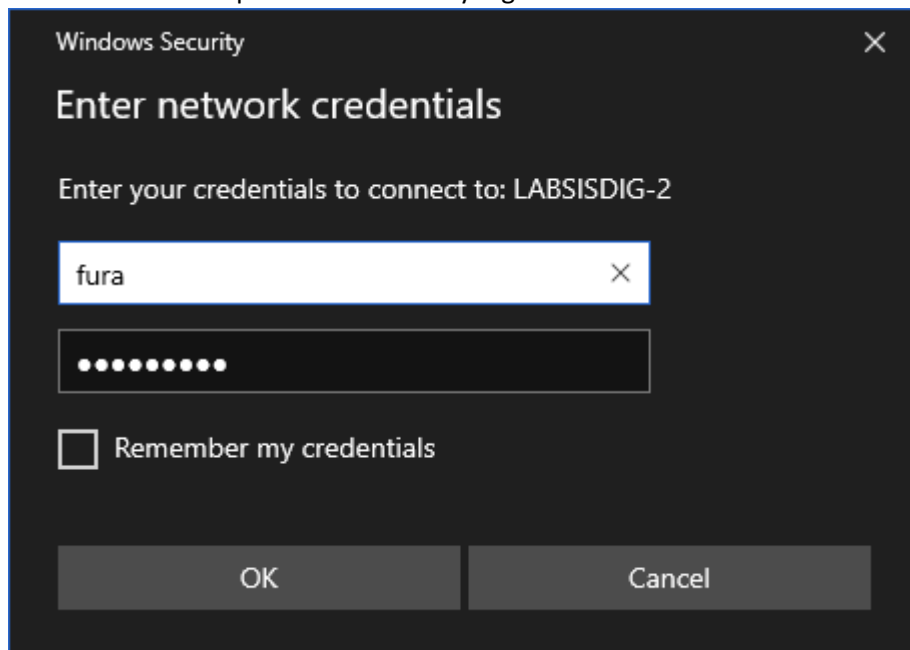

Akses yang sudah di share caranya (MAPPING) :

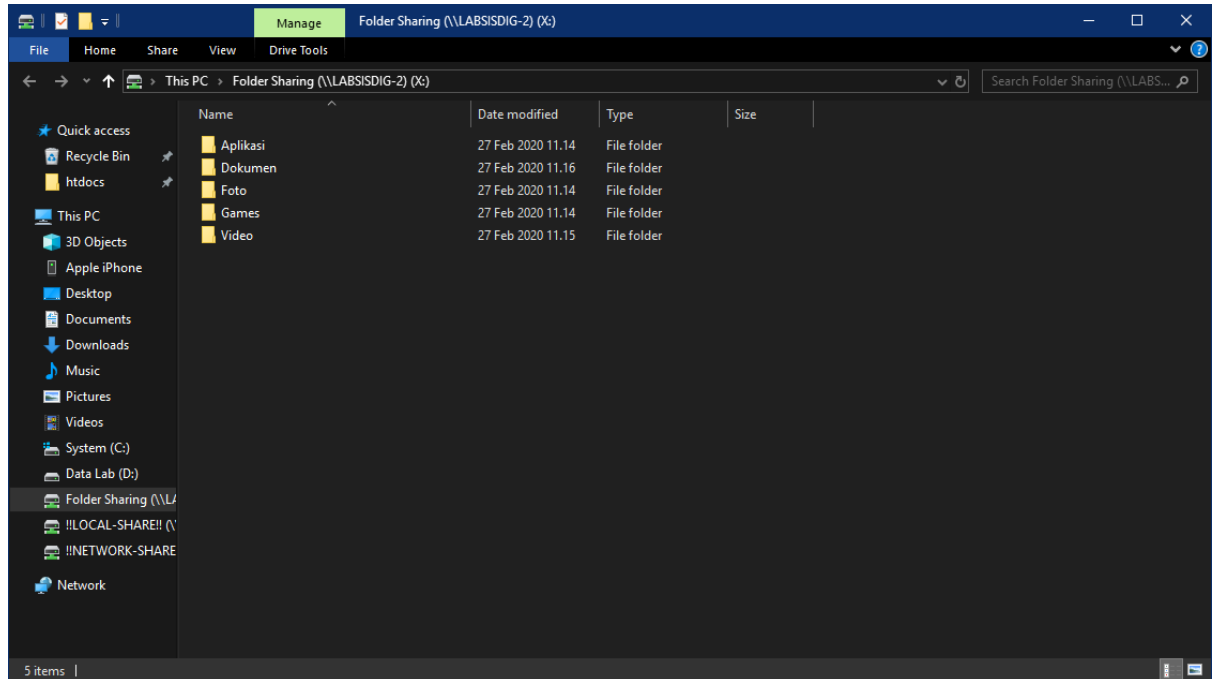

1. This PC > klik kanan > Map network drive... , trs isi sesuai direktori yang tadi dicatet. Klik connect & reconnect > finish.

2. Isi username sama password account yang td dibuat.

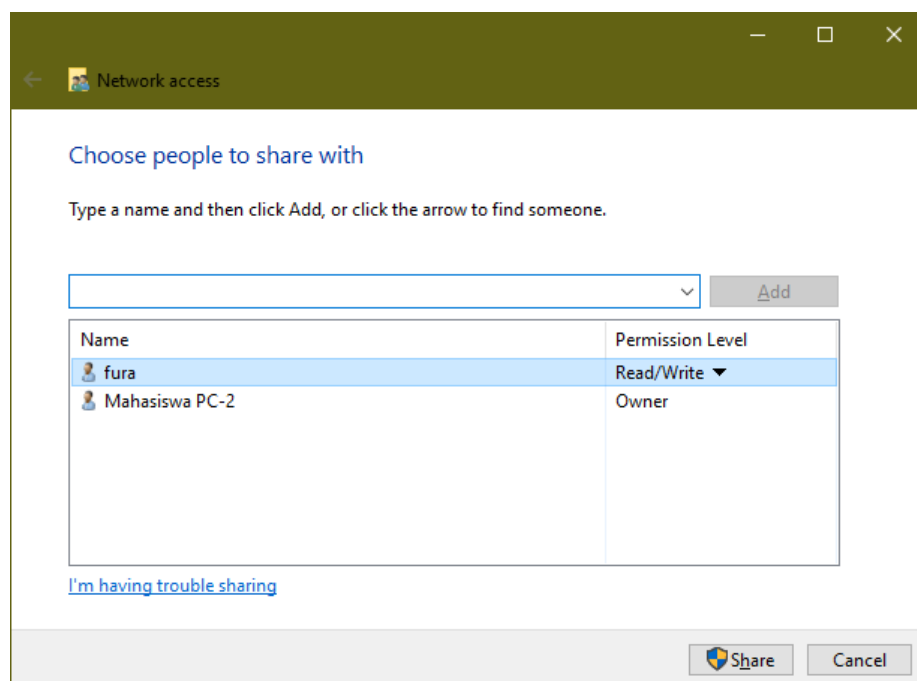

3. Klik OK, muncul kek gini

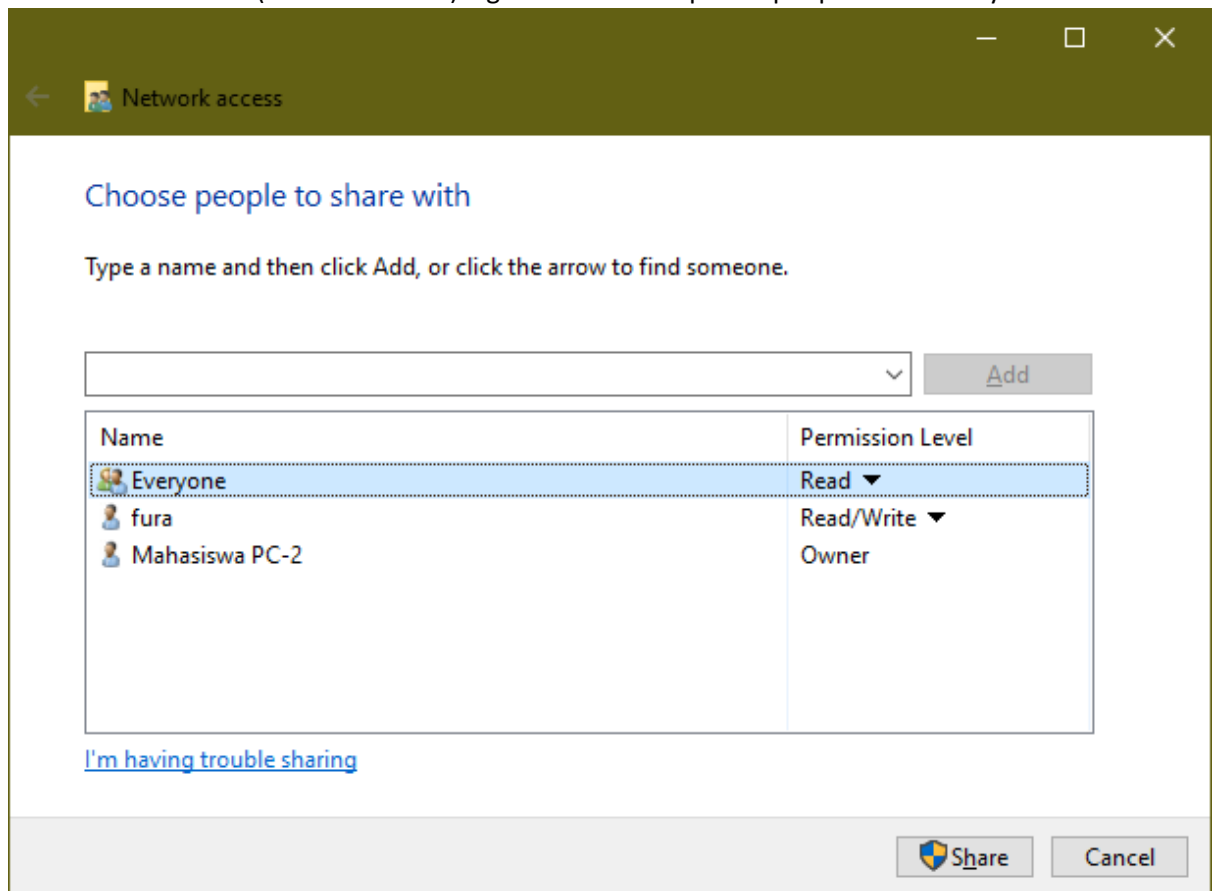

Kalo dengan cara di atas, jika kita membuka notes “identitas.txt” di folder sharing yang sudah dibuat, terus mau ngetik kata2 trs save dan replace, itu gabisa karena settingnya “read”. Jd kita harus ubah dulu settingnya di : Data D > VM-123170110 .

Klik kanan Folder sharing > specific people > pilih fura > ubah jadi read & write

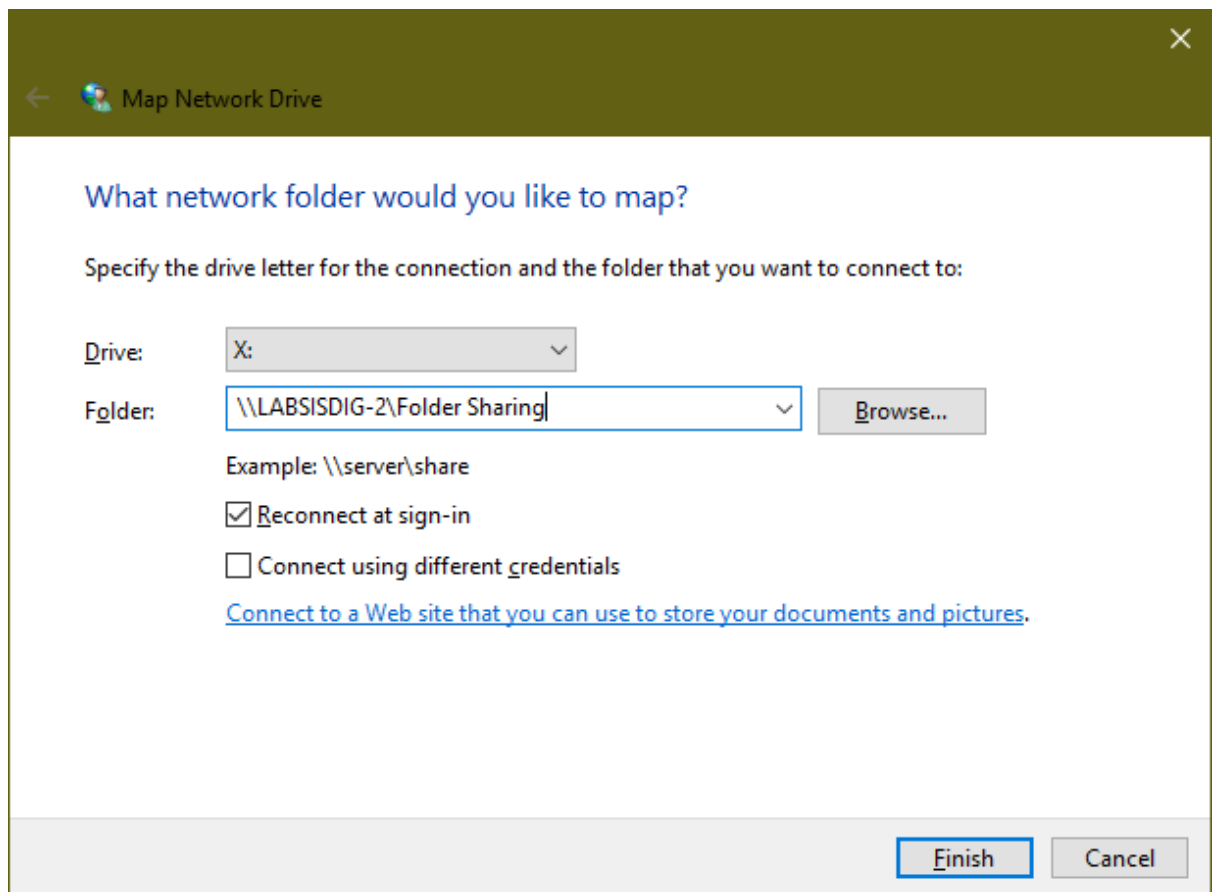

Eksperimen sharing to everyone (biar bisa diakses semua orang)

1. Klik kanan di data D (VM-123170110) > give access to > specific people. Ketik everyone.

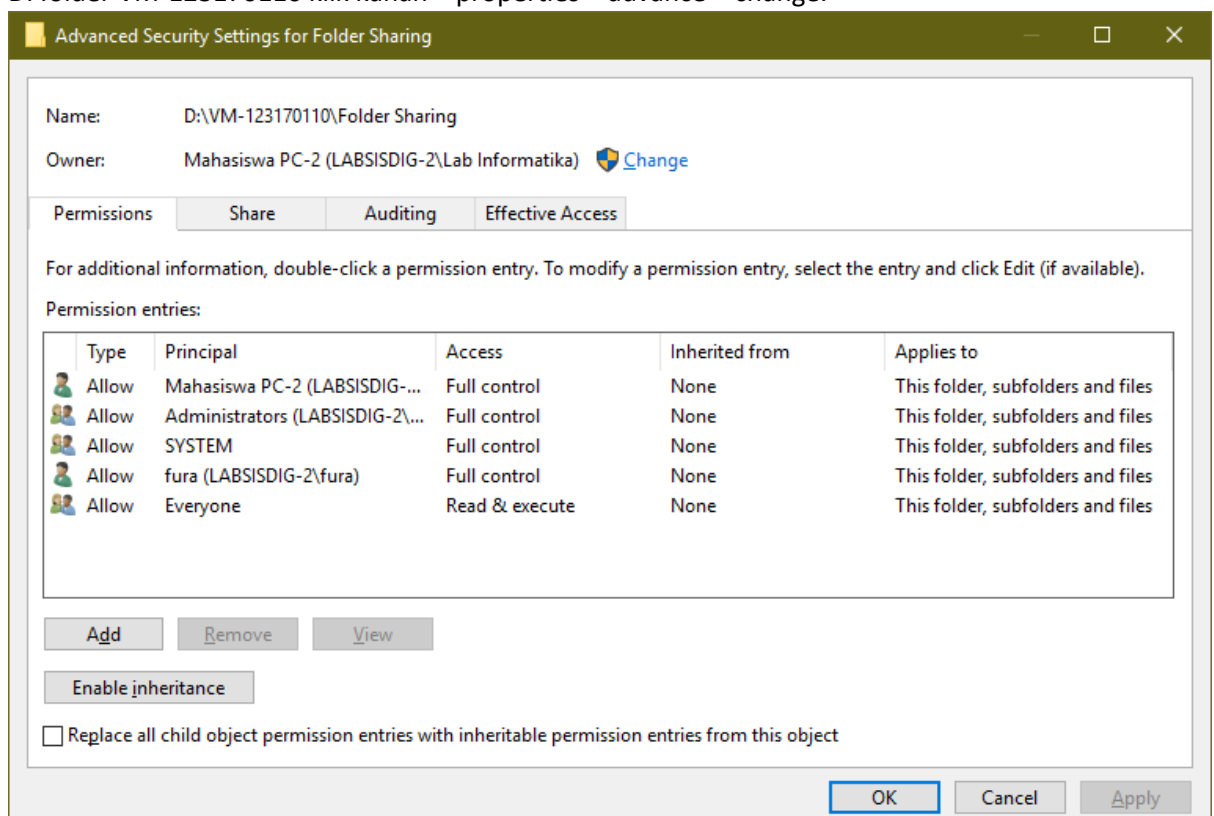

2. Tapi ilangin dulu yang folder sharing sebelumnya. Caranya : Folder sharing klik kanan > disconnect.
3. Mapping ulang caranya : This PC klik kanan > Map Network Drive > isi direktori kek gini.

Mengubah kepemilikan folder sharing.

1. Di folder VM-123170110 klik kanan > properties > advance > change.

Select User or Group

Buka local domain dengan hosts file

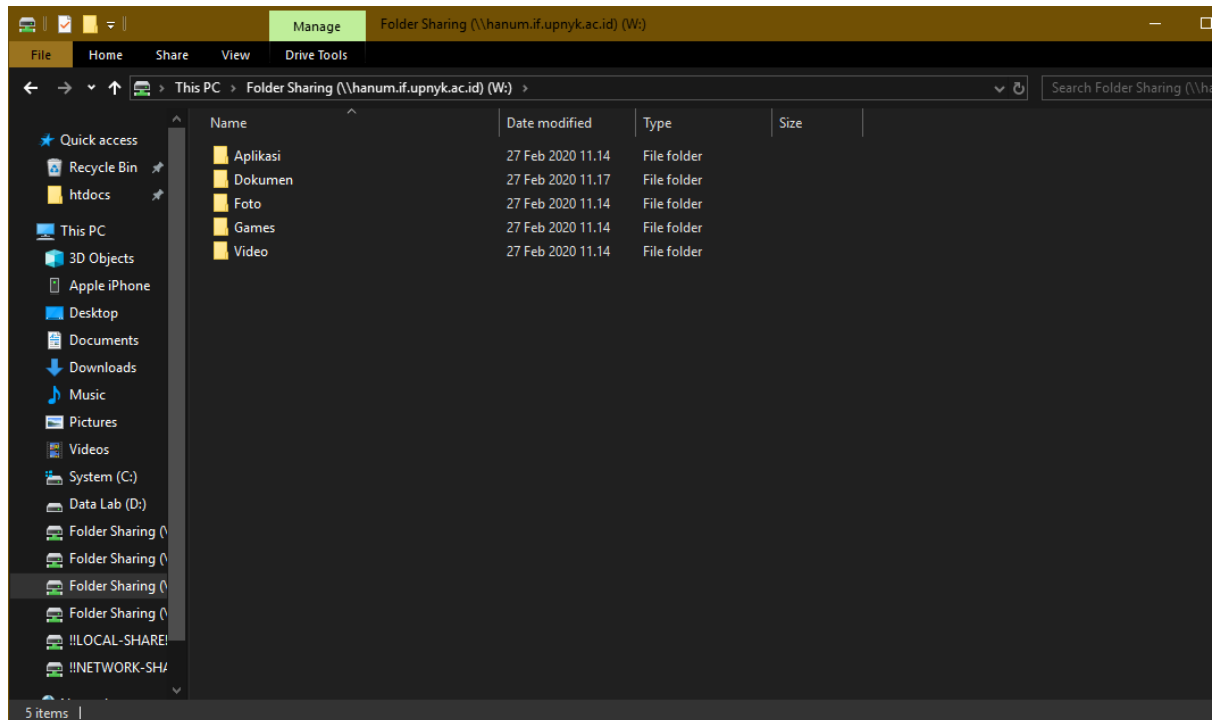

Windows > system32 > drivers > etc > hosts (tambah ip nama.if.upnyk.ac.id) copy desktop -> mapping lg tapi tiap punya orang disimpen di drive yang beda biar ga kereplace.

HASIL :

1. Devia

2. Hanum

3. Nadia
