Membuat Layanan File Sharing dengan FREENAS

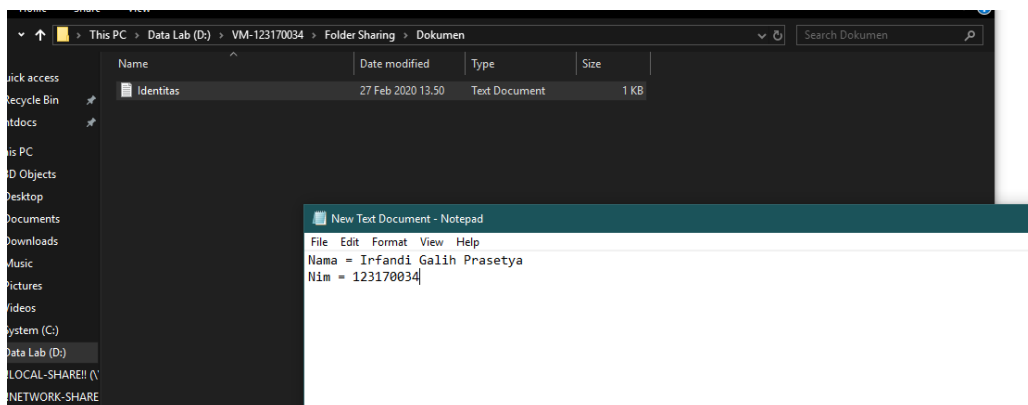

Local File Sharing (SAMBA)

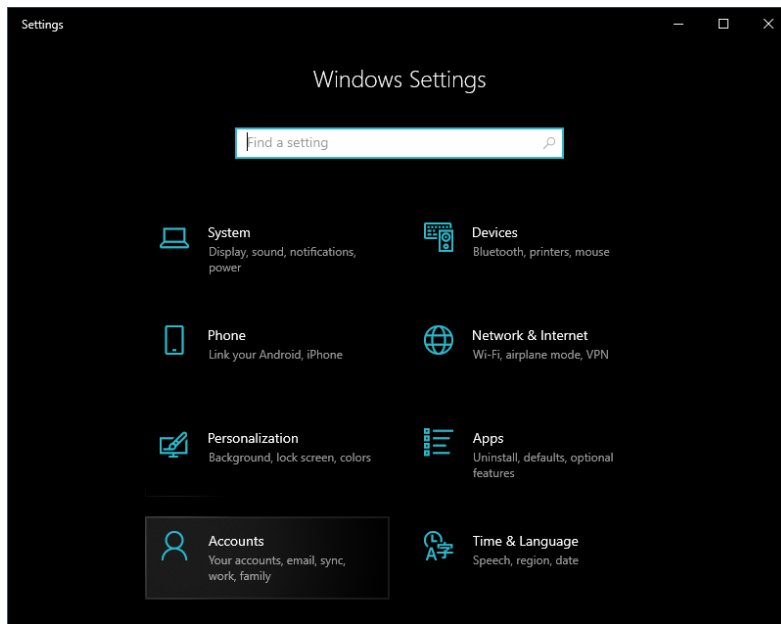

Di dalam folder VM-Nim buat Folder baru “Folder Sharing”

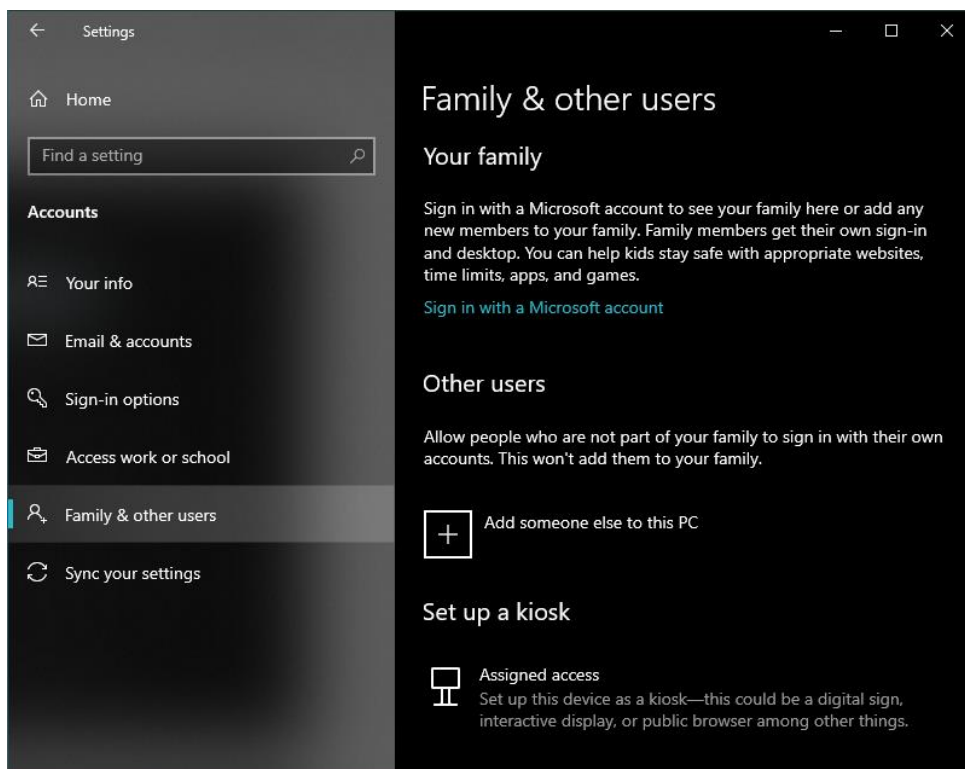

Di dalam Folder Tersebut buatlah 5 folder seperti diatas

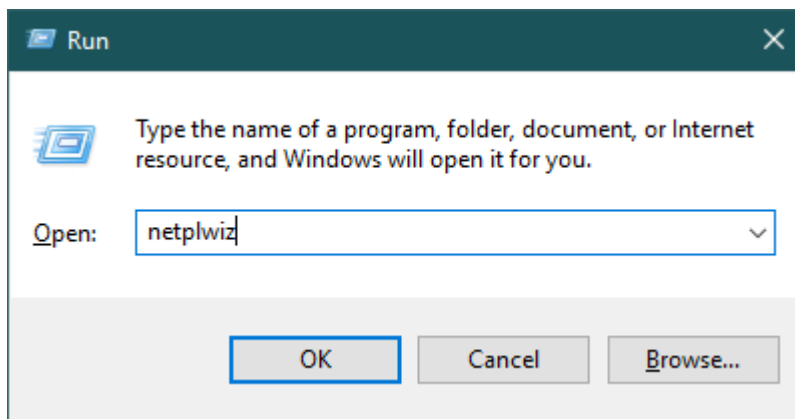

Di dalam folder dokumen buat txt yang berisikan identitas seperti gambar diatas

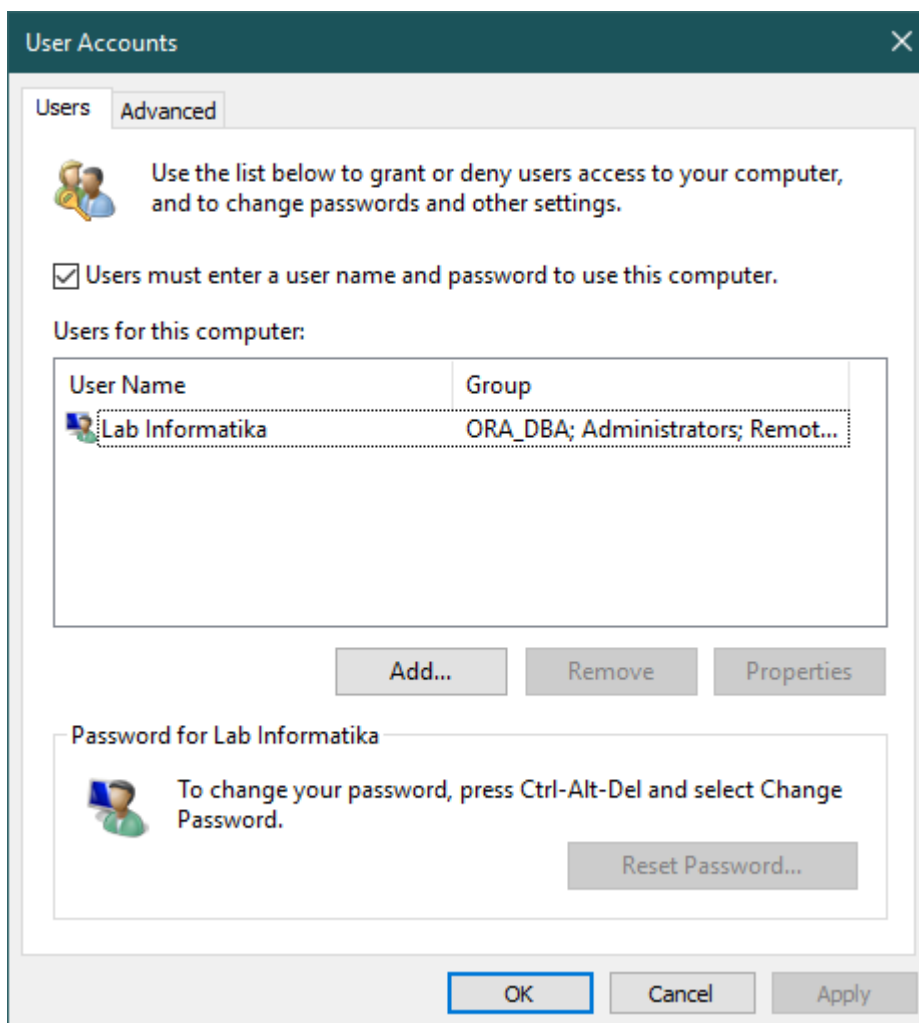

Masuk ke windows setting klik account

Family & other users klik add someone else to this pc

Cara lain untuk membuat akun baru adalah run “netplwiz”

Klik add

How will this person sign in?

What email address would this person like to use to sign in to Windows? (If you know the email address they use to sign in to Microsoft services, enter it here.)

[Sign up for a new email address](#)

This person can sign in to easily get their online email, photos, files, and settings (like browser history and favorites) on all of their devices. They can manage their synced settings at any time.

[Privacy statement](#)

[Sign in without a Microsoft account \(not recommended\)](#)

Cancel

Klik Sign in without a microsoft account

← Add a user

There are two options for signing in:

Microsoft account

Signing in to PCs with your email address lets you:

- Download apps from Windows Store.
- Get your online content in Microsoft apps automatically.
- Sync settings online to make PCs look and feel the same—like your browser history, account picture, and color.

Local account

Signing in with a local account means:

- You have to create a user name and account for each PC you use.
- You'll need a Microsoft account to download apps, but you can set it up later.
- Your settings won't be synced across the PCs that you use.

Microsoft account

Local account

Cancel

Klik local Account

← Add a user

Choose a password that will be easy for you to remember but hard for others to guess. If you forget, we'll show the hint.

User name

Password

Reenter password

Password hint

Next Cancel

Isi lalu next dan klik finish

User Accounts

Users Advanced

Use the list below to grant or deny users access to your computer, and to change passwords and other settings.

☒ Users must enter a user name and password to use this computer.

Users for this computer:

User Name	Group
galih	Users
Lab Informatika	ORA_DBA; Administrators; Remot...

Add... Remove Properties

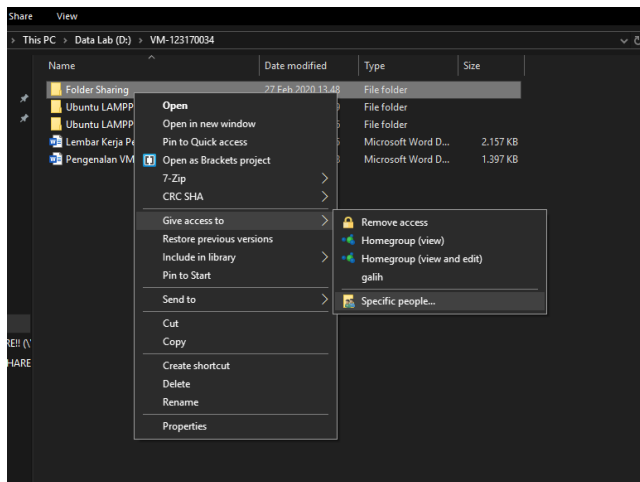

Password for Lab Informatika

To change your password, press Ctrl-Alt-Del and select Change Password.

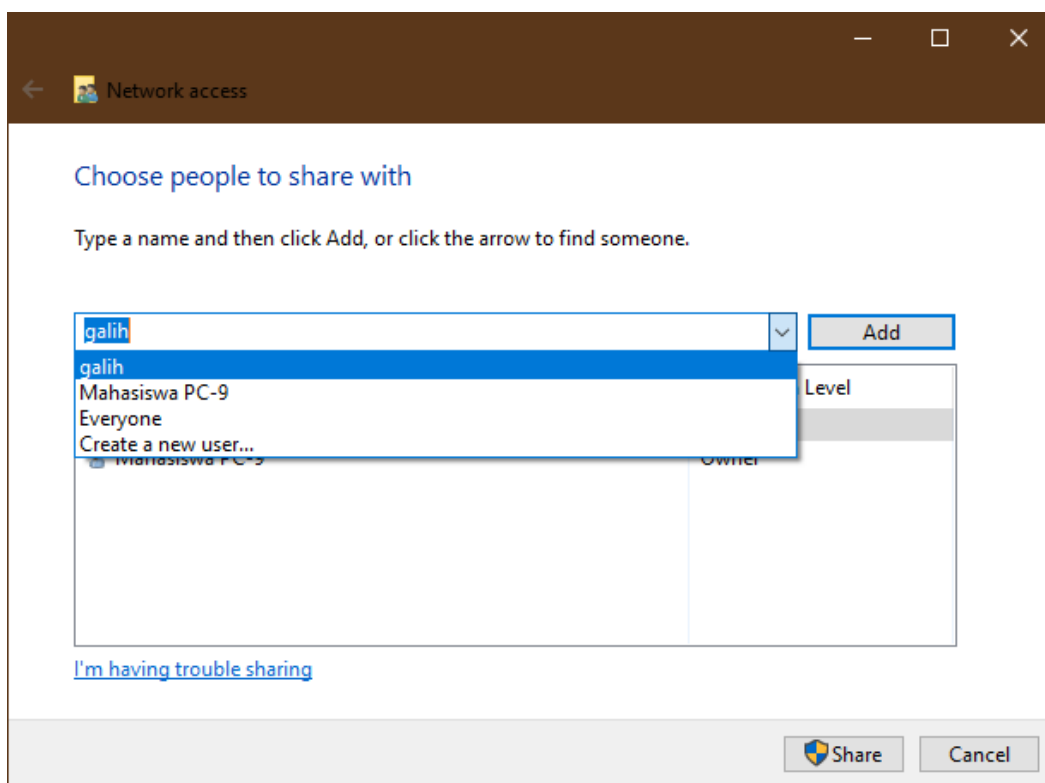

Reset Password...

OK Cancel Apply

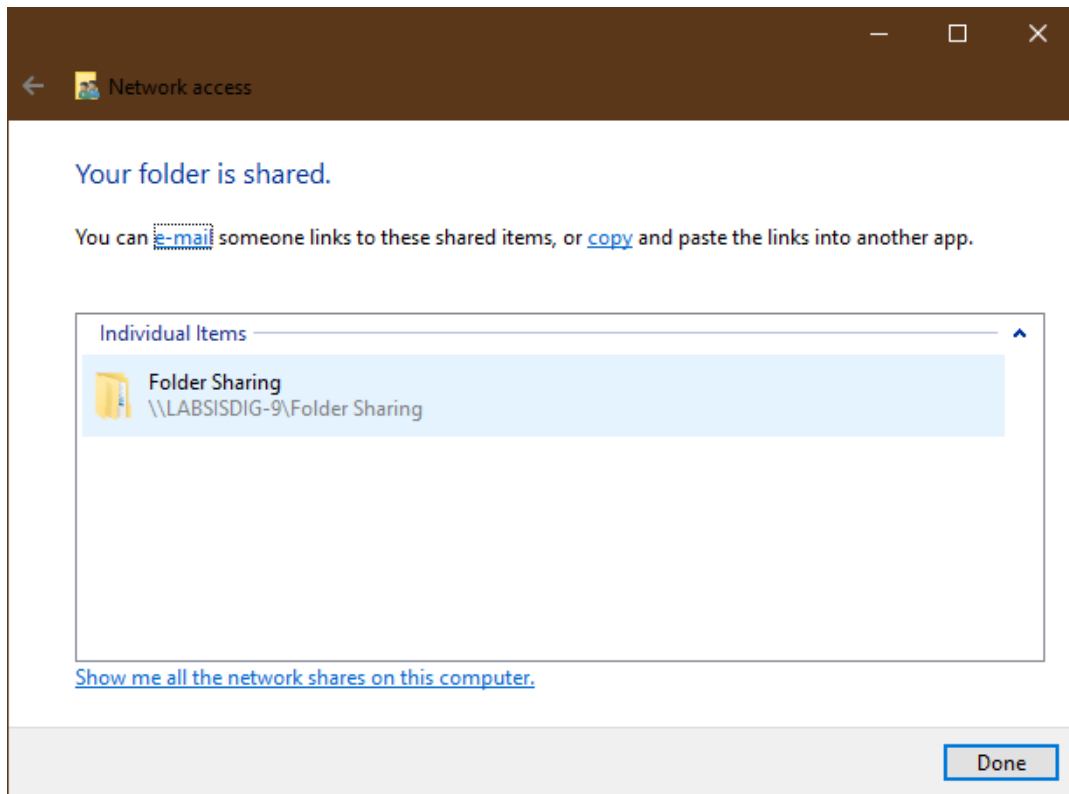

Akan muncul seperti gambar diatas

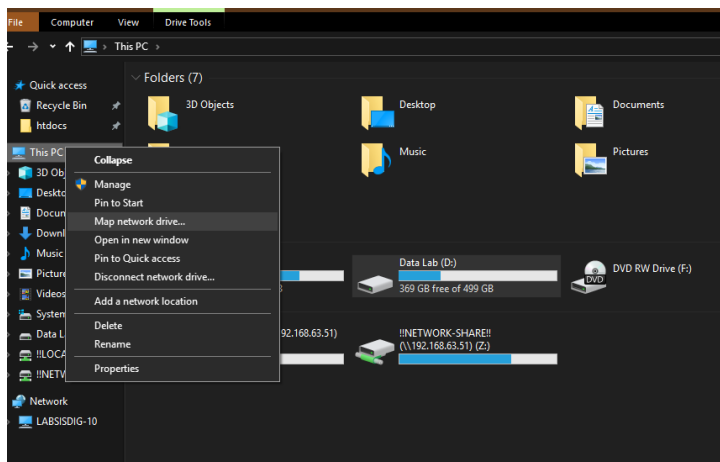

Klik kanan folder sharing – give acces to – specific people

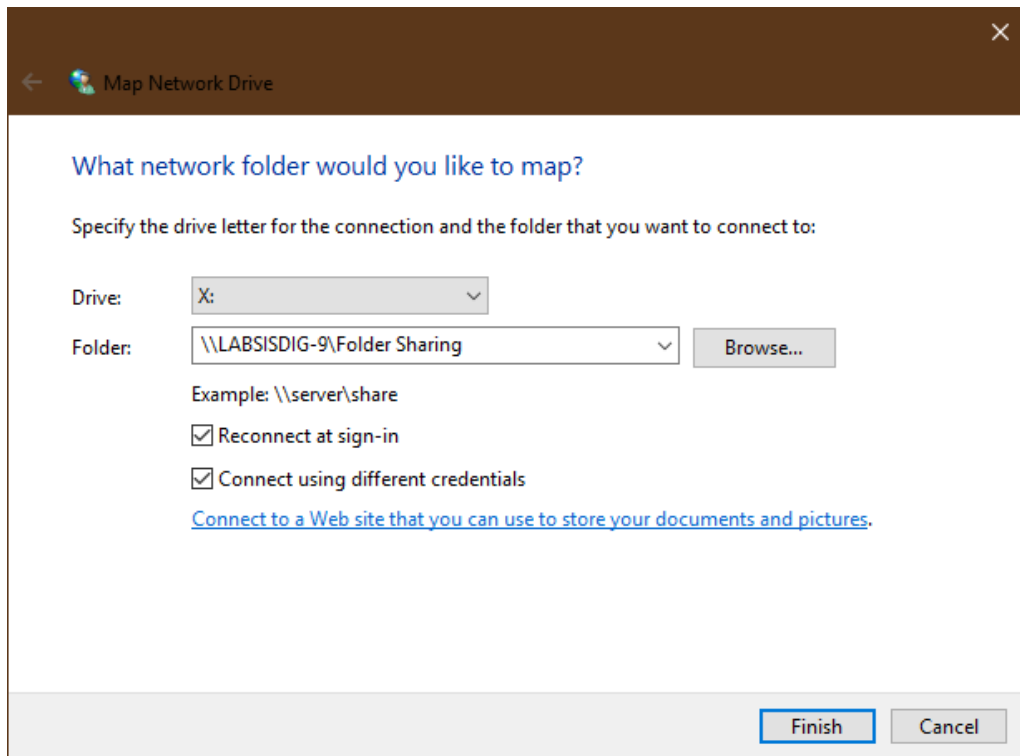

Add account user yang tadi sudah di buat lalu pilih acc tersebut dan share

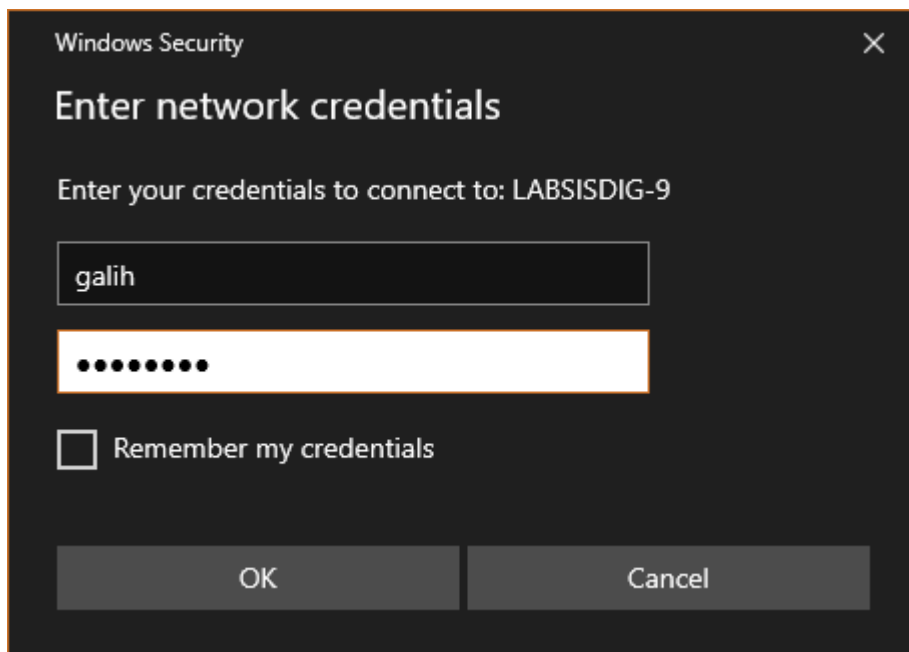

Catat Url “<\\LABSISDIG-9\Folder Sharing>”

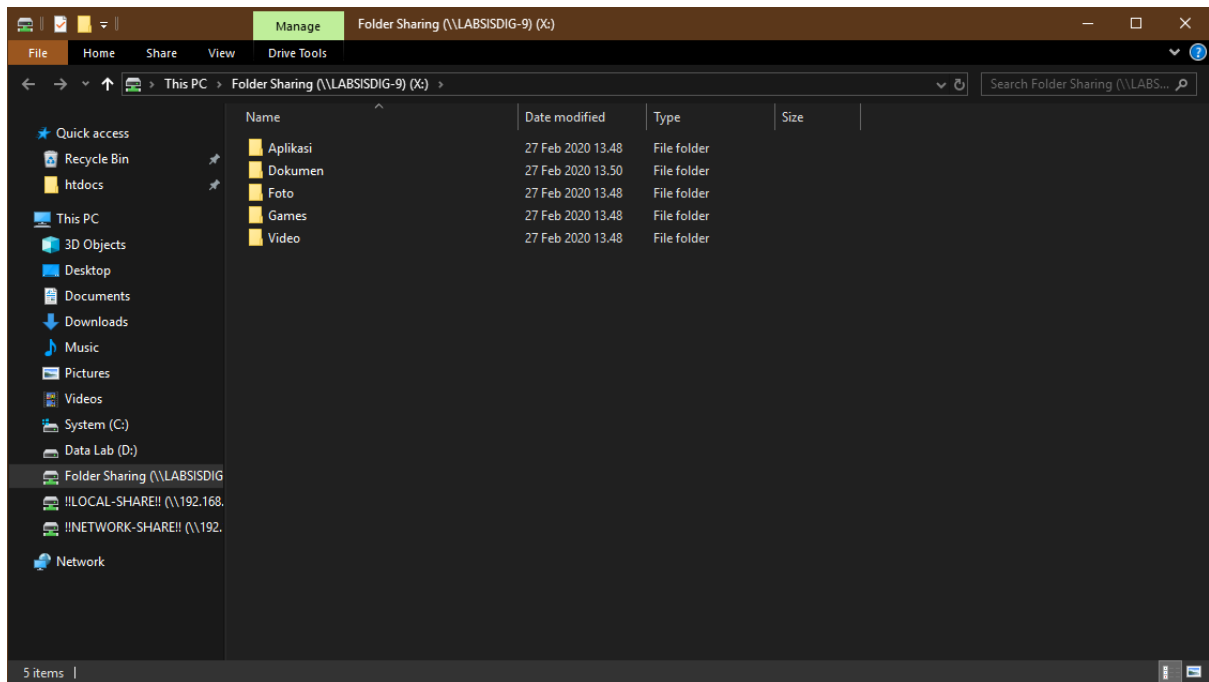

Klik kanan this pc – map network drive...

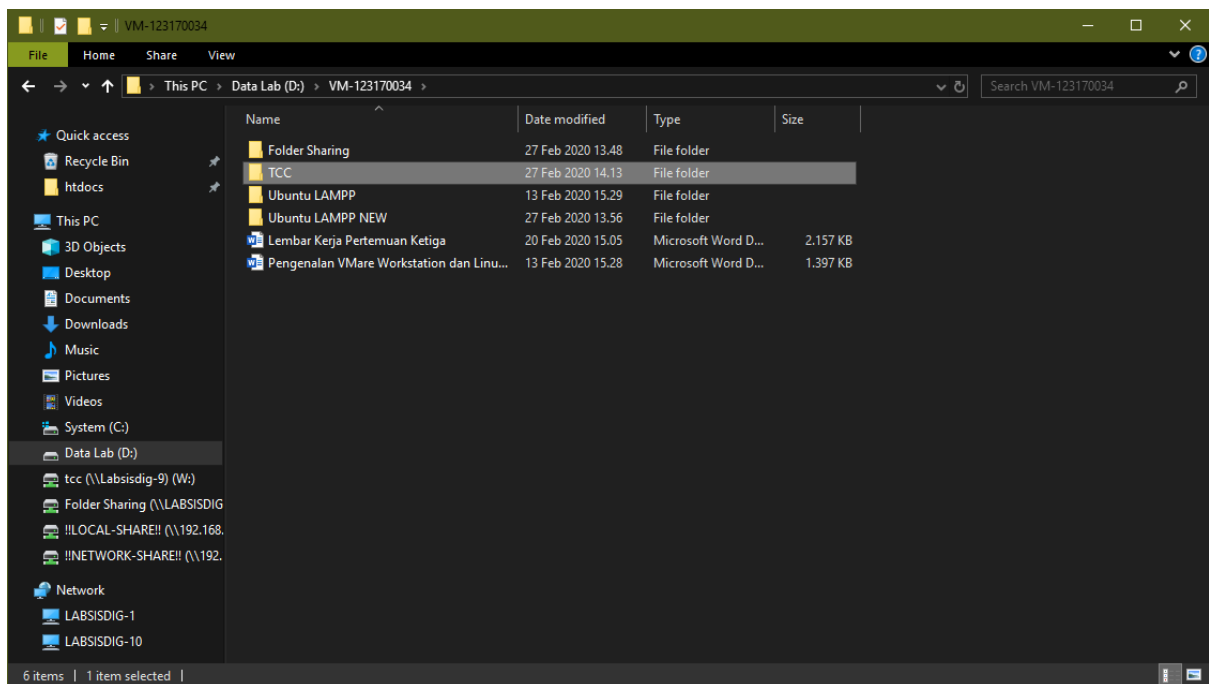

Isi kolom folder dengan url yang sudah di catat tadi dan centang 2 opsi di bawah lalu finish

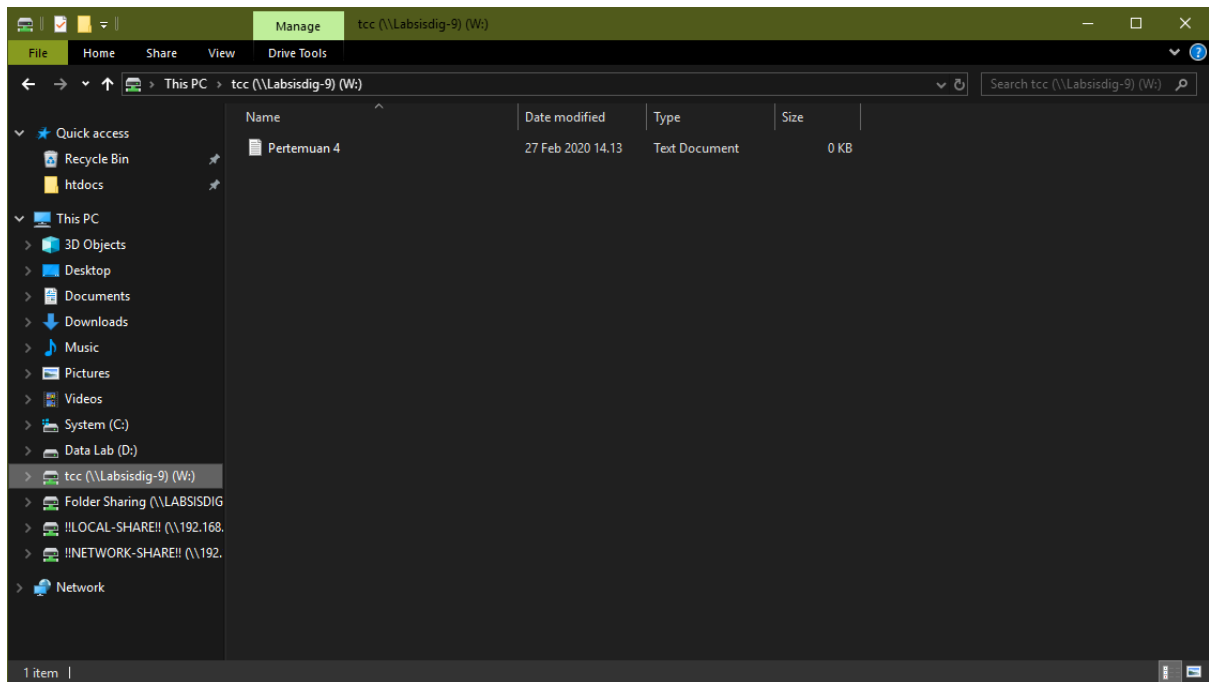

Masukkan username dan password yang sudah di buat tadi

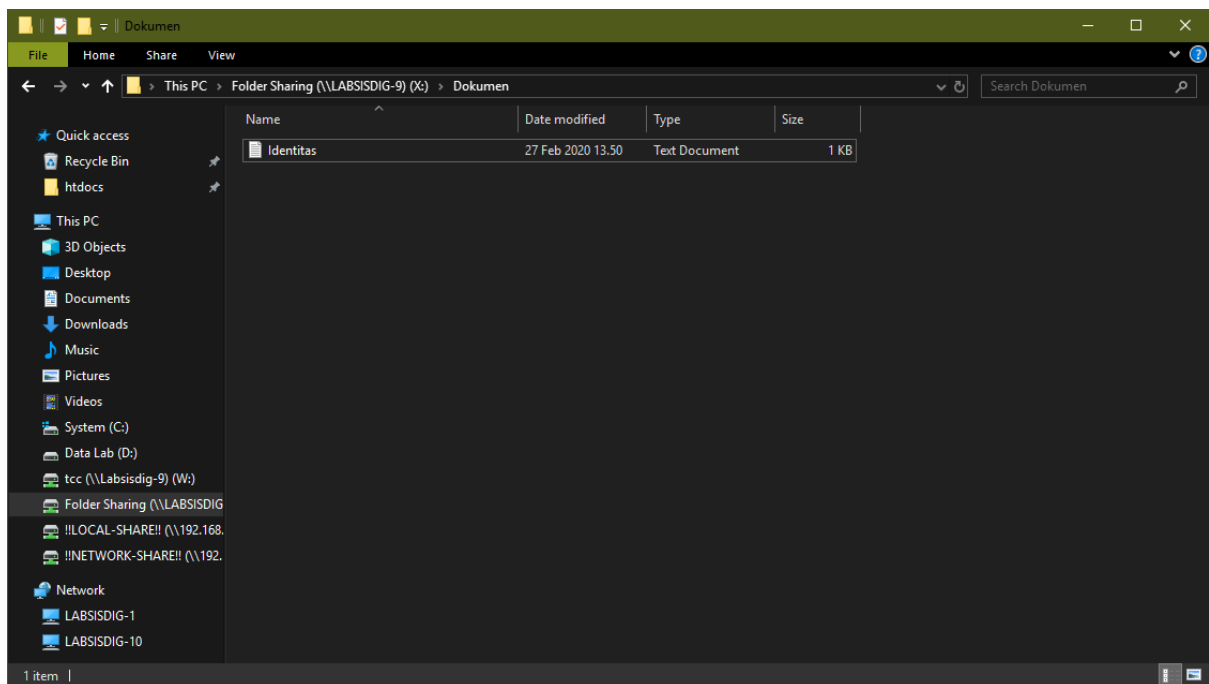

Lalu akan muncul folder sharing seperti gambar di atas

Buat Folder TCC di Folder VM-NIM lalu coba File Sharingkan lagi

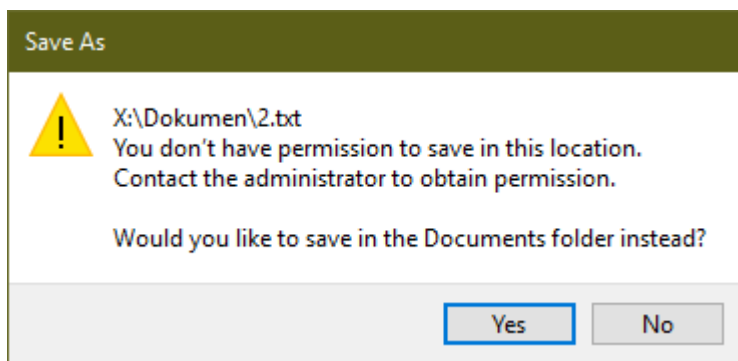

Hasil File Sharing File TCC seperti gambar di atas

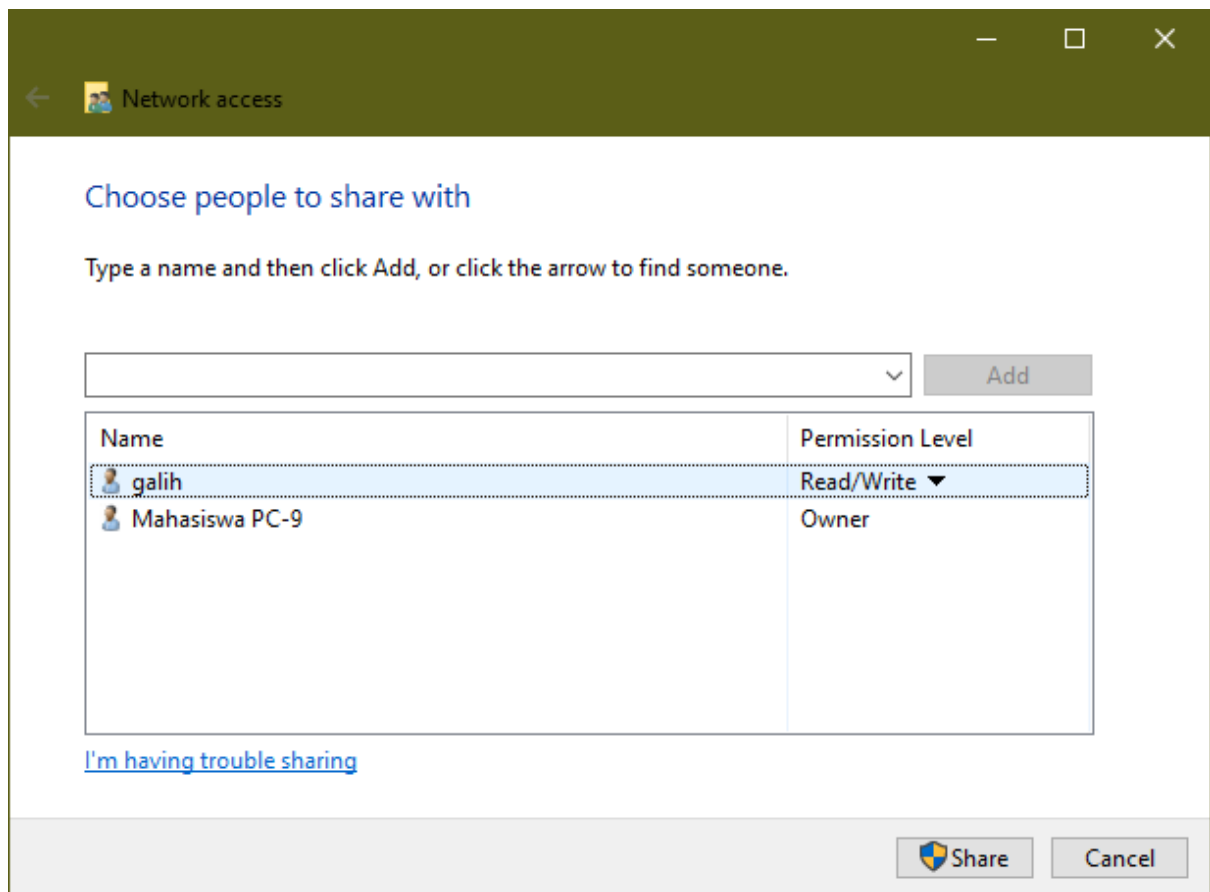

Buka Folder sharing yang sudah di buat tadi “Folder Sharing” dan buka dokumen dan buka file identitas

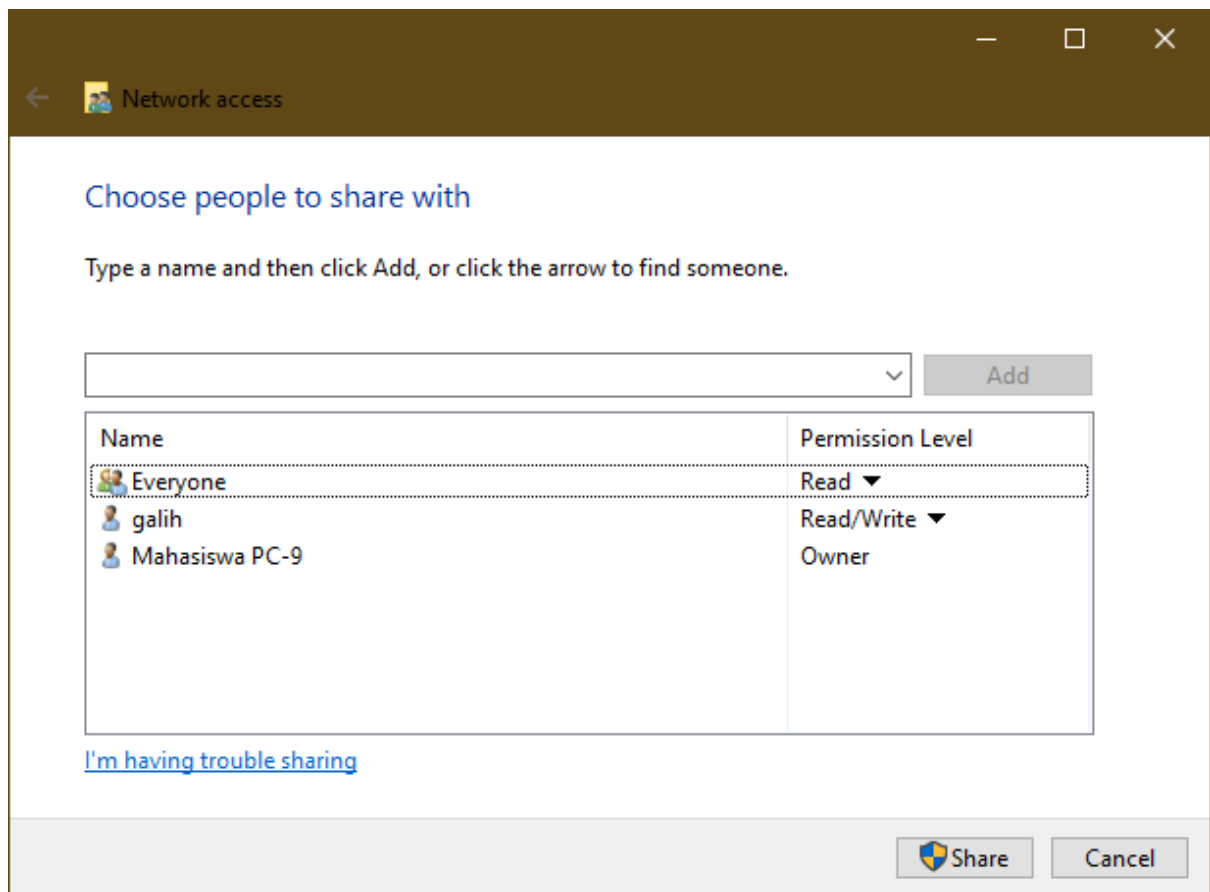

Lalu tambahkan kata kata dan save

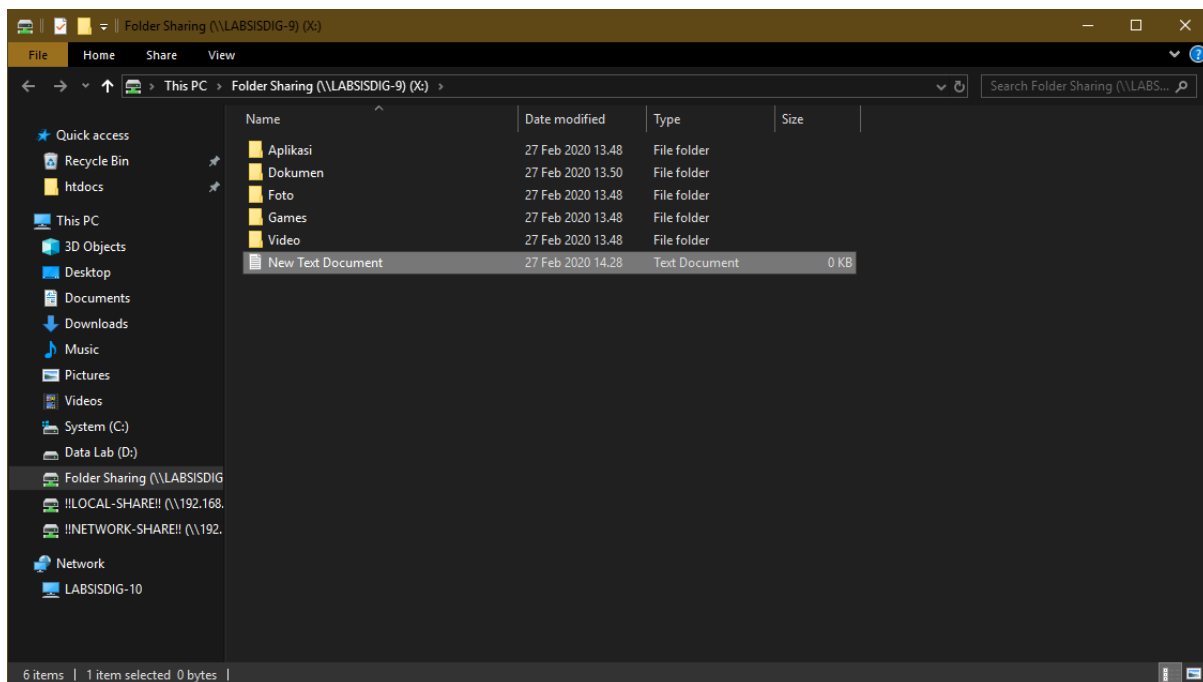

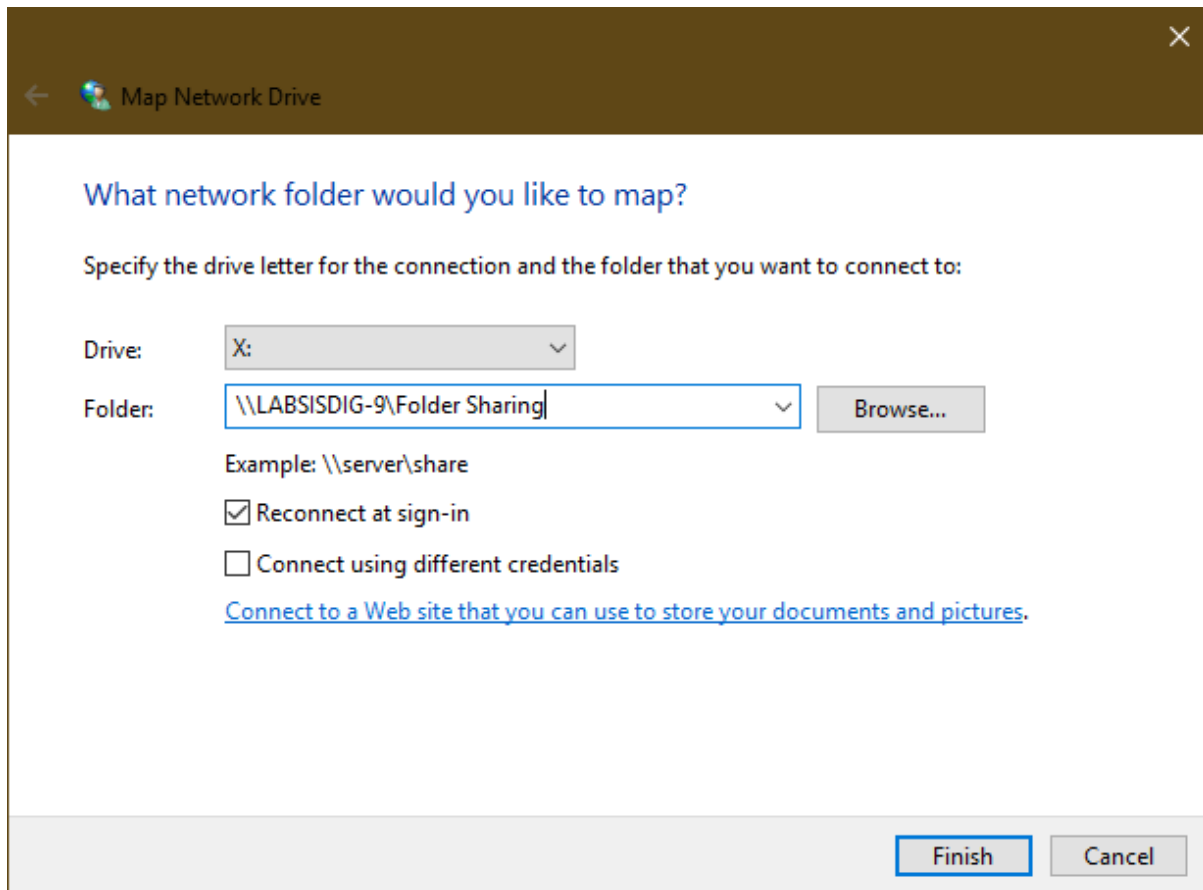

Akan muncul alert seperti di atas karena kita belum mempunyai access

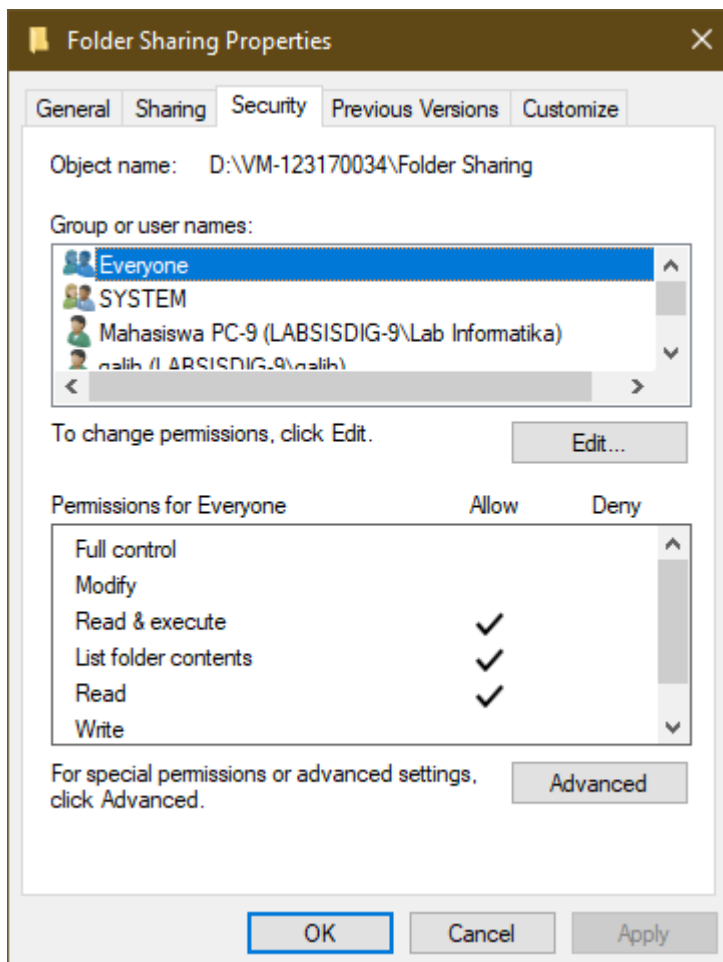

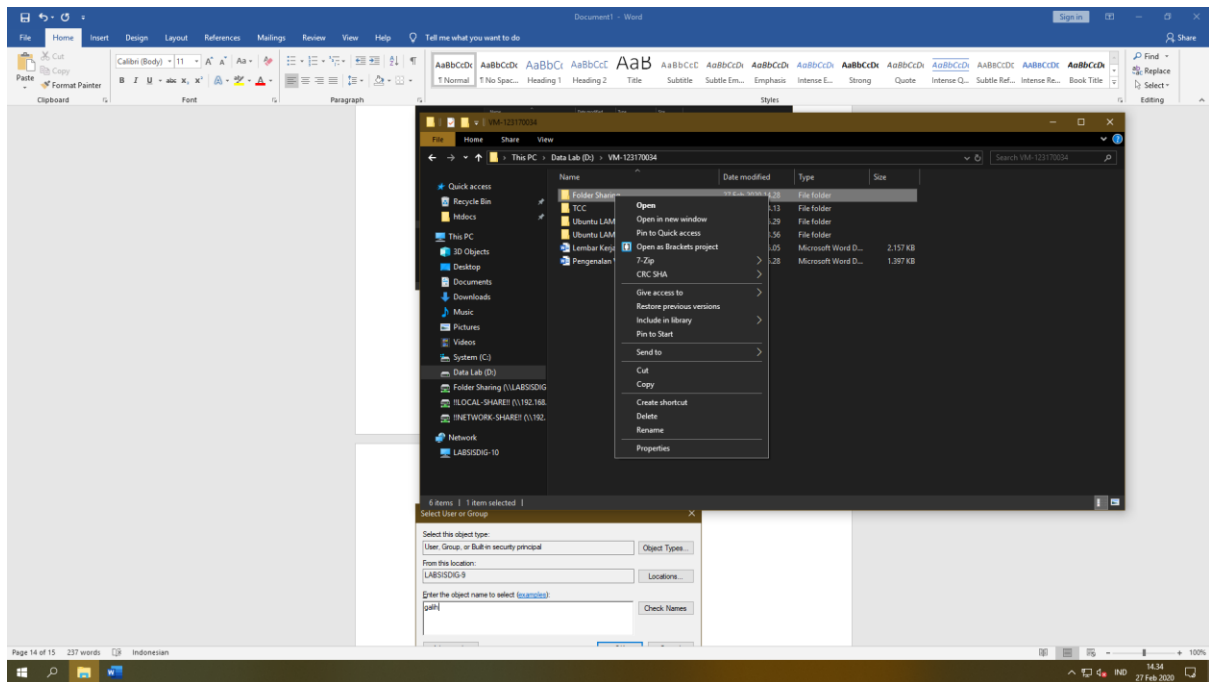

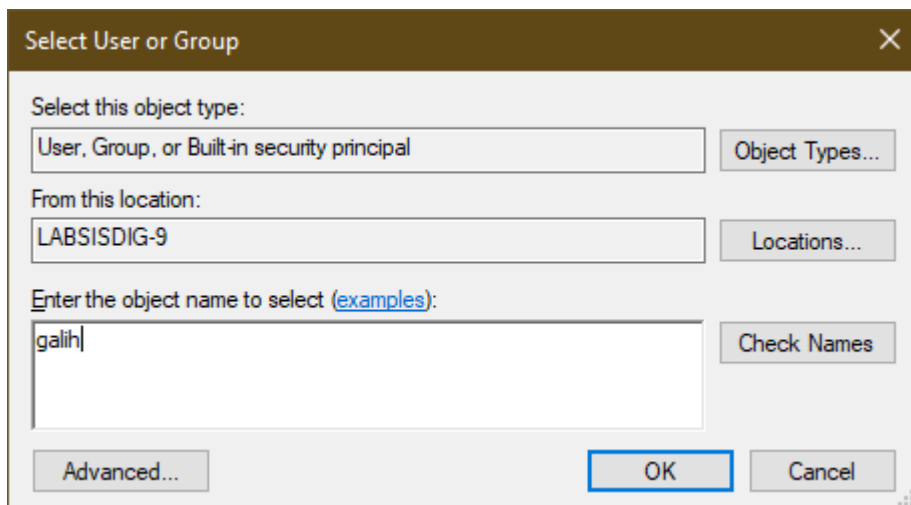

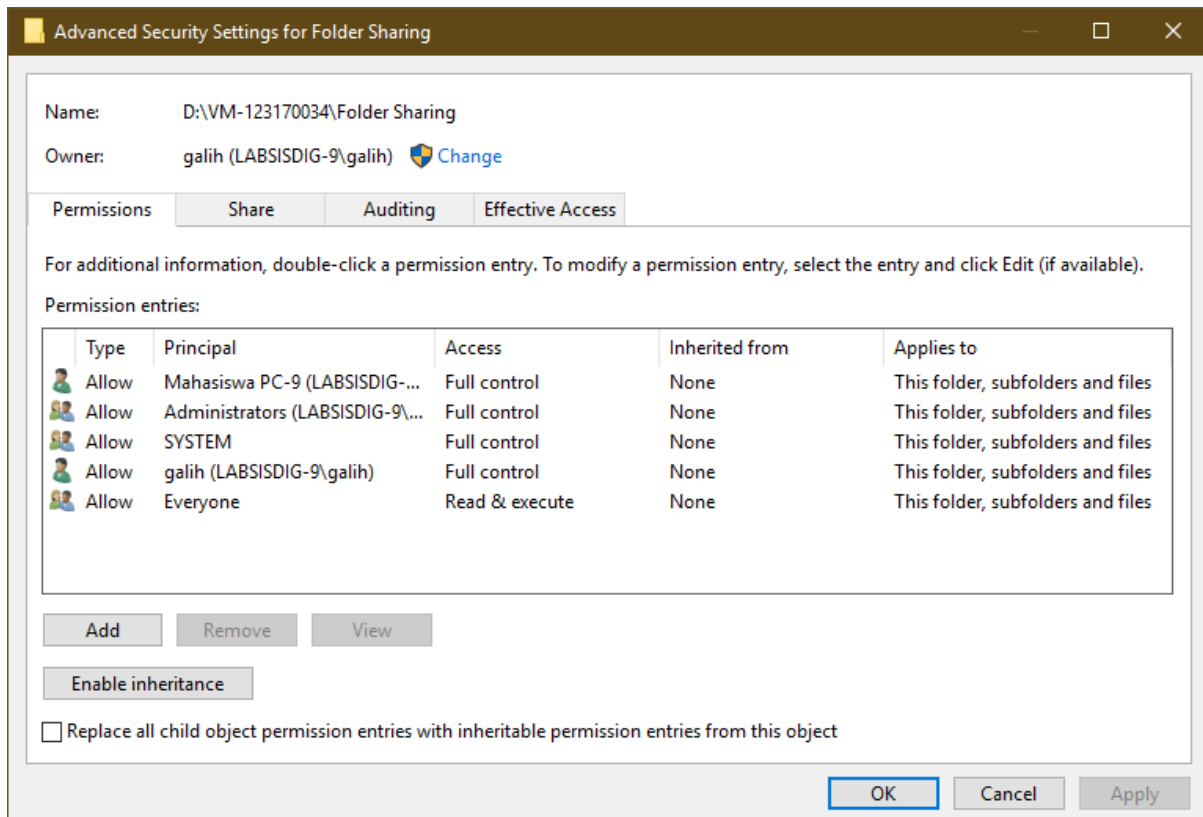

Cara mengatasinya dengan mengubah Permission Level menjadi Read/Write

Coba tambahkan everyone dan beri permission Level menjadi read

Select User or Group

Select this object type:

User, Group, or Built-in security principal

Object Types...

From this location:

LABSISDIG-9

Locations...

Enter the object name to select (examples):

LABSISDIG-9\galih

Check Names

Advanced...

OK

Cancel

Network access

Choose people to share with

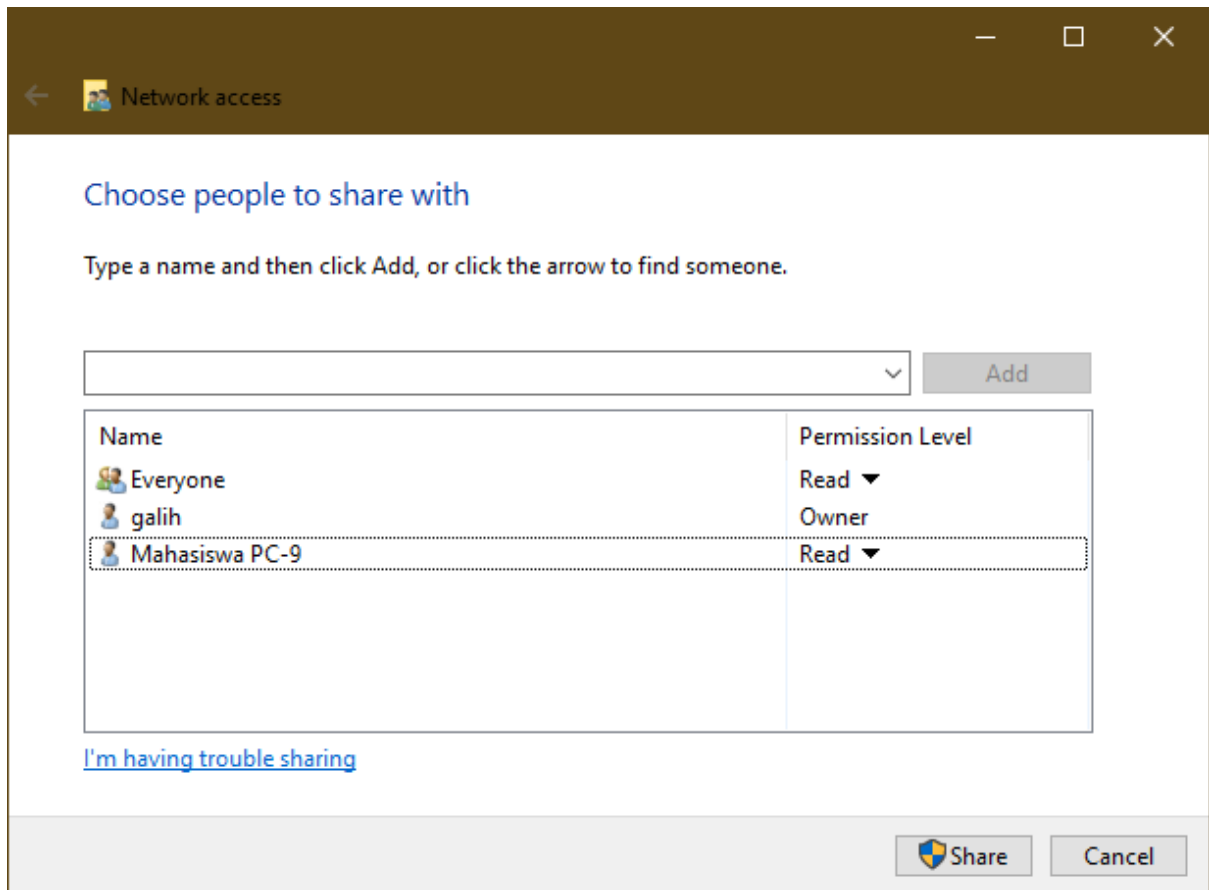

Type a name and then click Add, or click the arrow to find someone.

Add

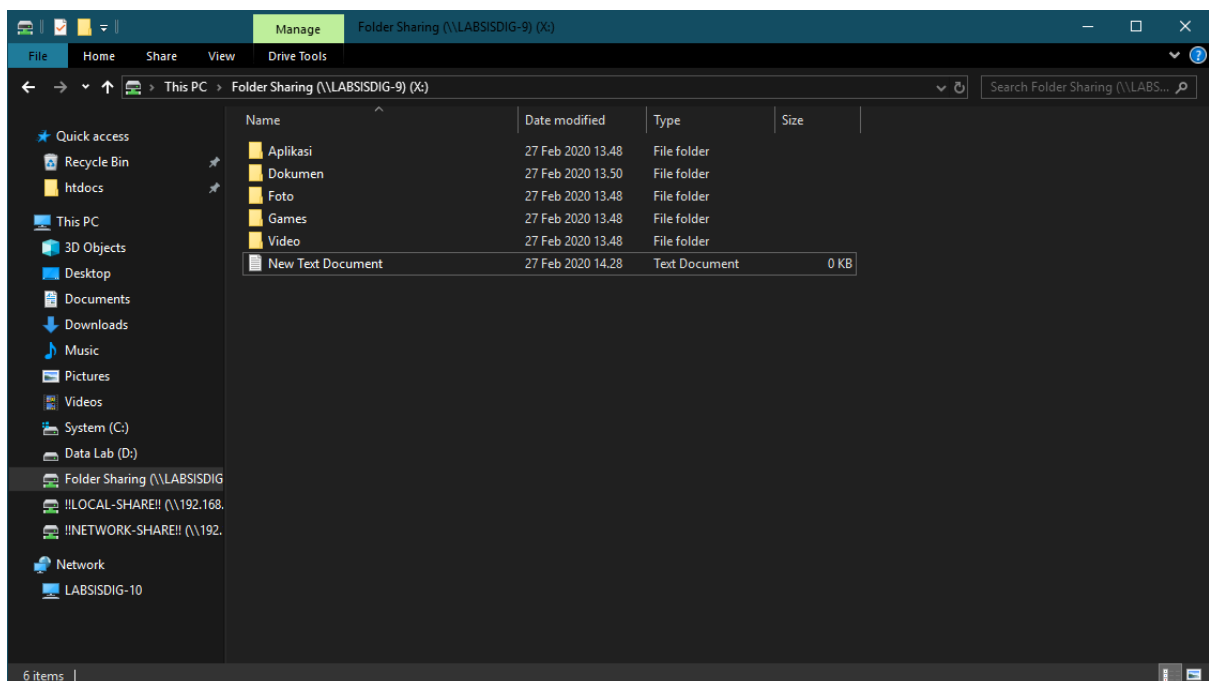

Name	Permission Level
Everyone	Read
galih	Owner
Mahasiswa PC-9	Read/Write

[I'm having trouble sharing](#)

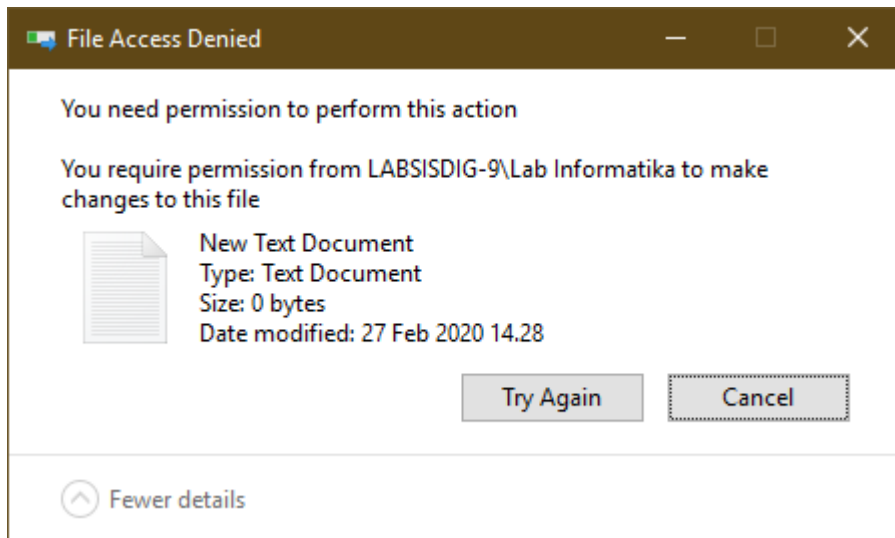

Share Cancel

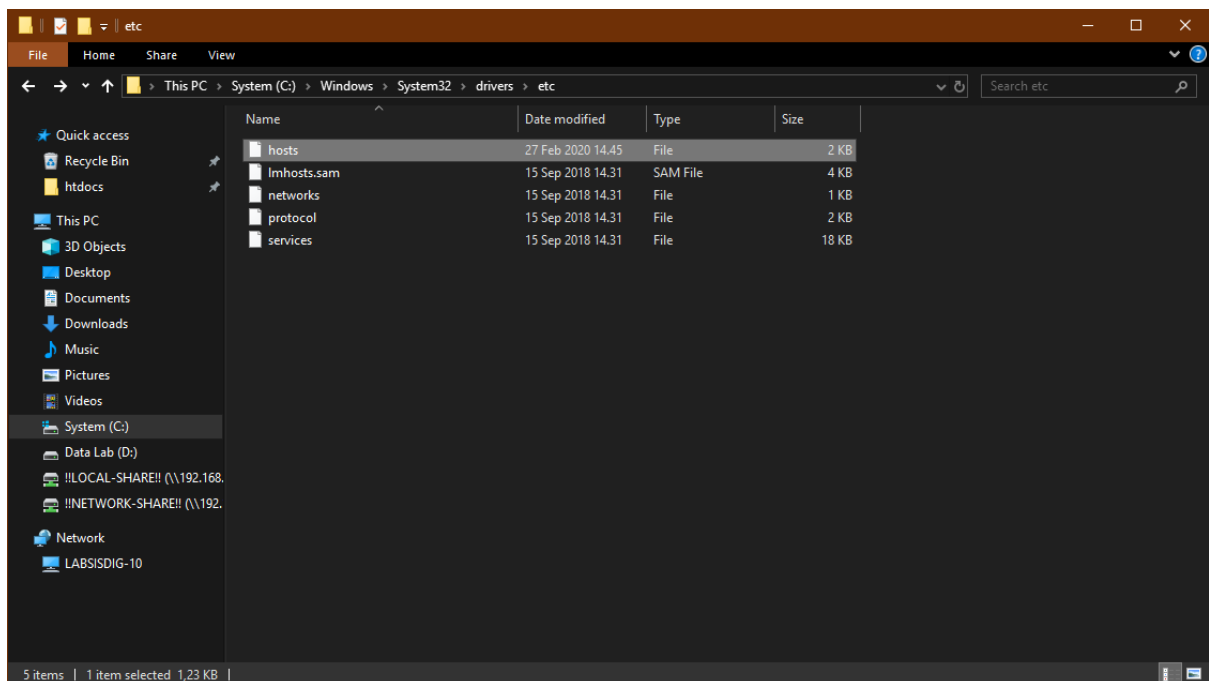

Lalu share – done

Lalu coba delete folder txt

Akan muncul alert seperti di atas karena tidak dapat akses untuk mengubah atau mengotak-atik file

Disconnect dari folder mapping dan copy file host pindahkan ke desktop

Lalu buka dan tambahkan ip teman Anda di bagian paling bawah

192.168.64.19 wildan.if.upnyk.ac.id

192.168.64.31 ayu.if.upnyk.ac.id

192.168.64.30 judanti.if.upnyk.ac.id

Lalu replace host yang di C:/Windows... dengan yang sudah di edit

Coba mapping dengan ip/url teman Anda tadi
