

LEMBAR KERJA PRAKTIKUM CLOUD COMPUTING

INSTALASI DAN KONFIGURASI LAYANAN FILE SHARING DENGAN FREENAS

IDENTITAS:

Nama:	Salsabila Lattifa Fikri
NIM:	123170084
Kelas:	A
Hari, Tanggal:	Kamis, 05 Maret 2020

CONTOH ISIAN DAN PETUNJUK:

1. **[Contoh]** Gunakan ISO FreeNAS-11.2-U5 di folder ISO Library

2. **[Contoh]** Deskripsikan parameter yang digunakan untuk keluar dari akun root

```
$ exit
```

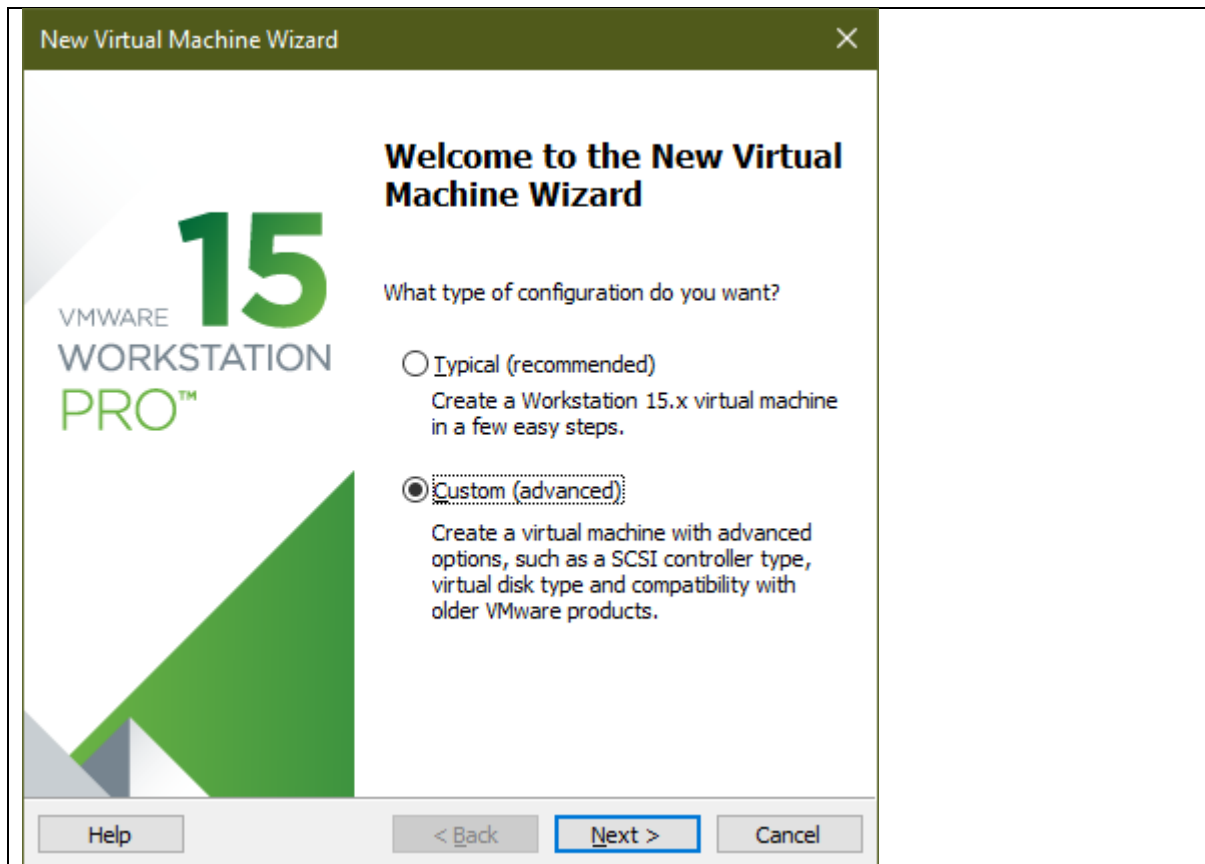

Perintah exit digunakan untuk keluar dari sesi akun aktif

3. **[Contoh]** Tampilkan pesan kesalahan pada saat login PHPMYAdmin

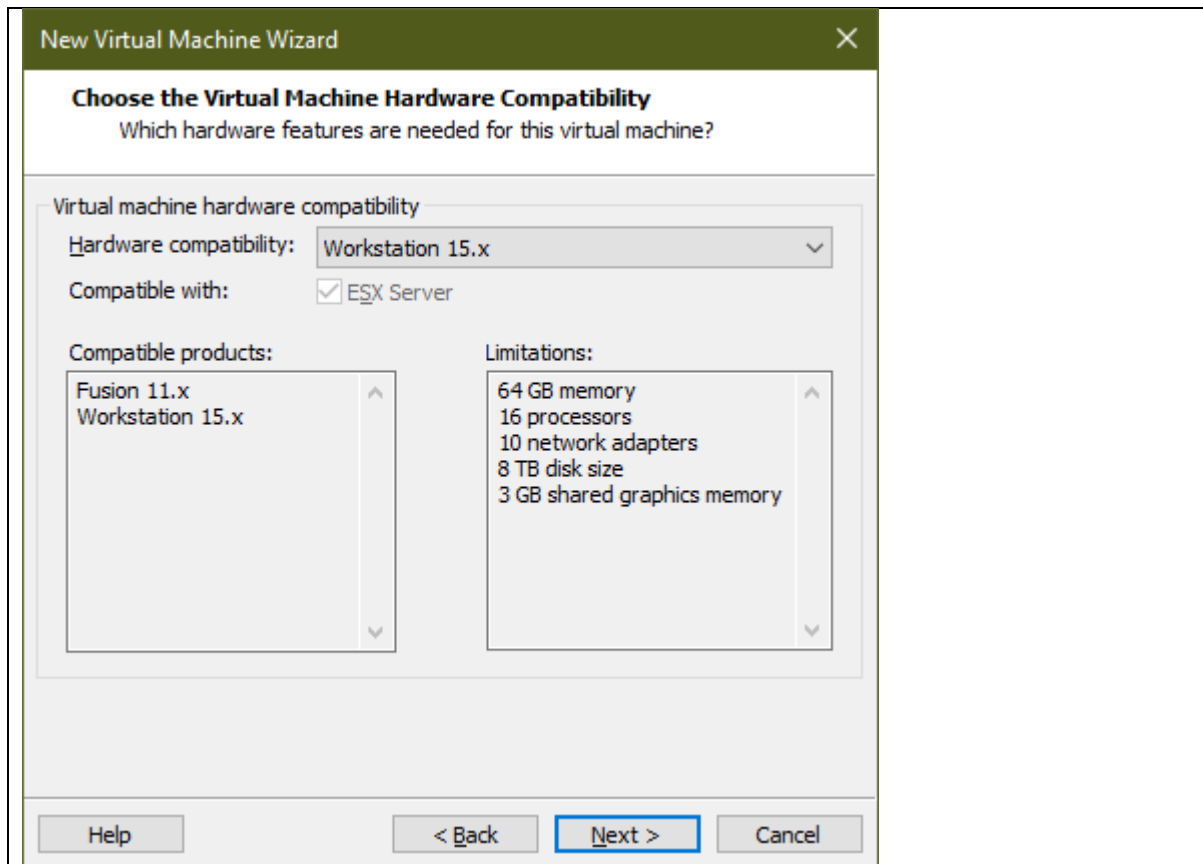

TUGAS BAGIAN PERTAMA – PEMBUATAN VM:

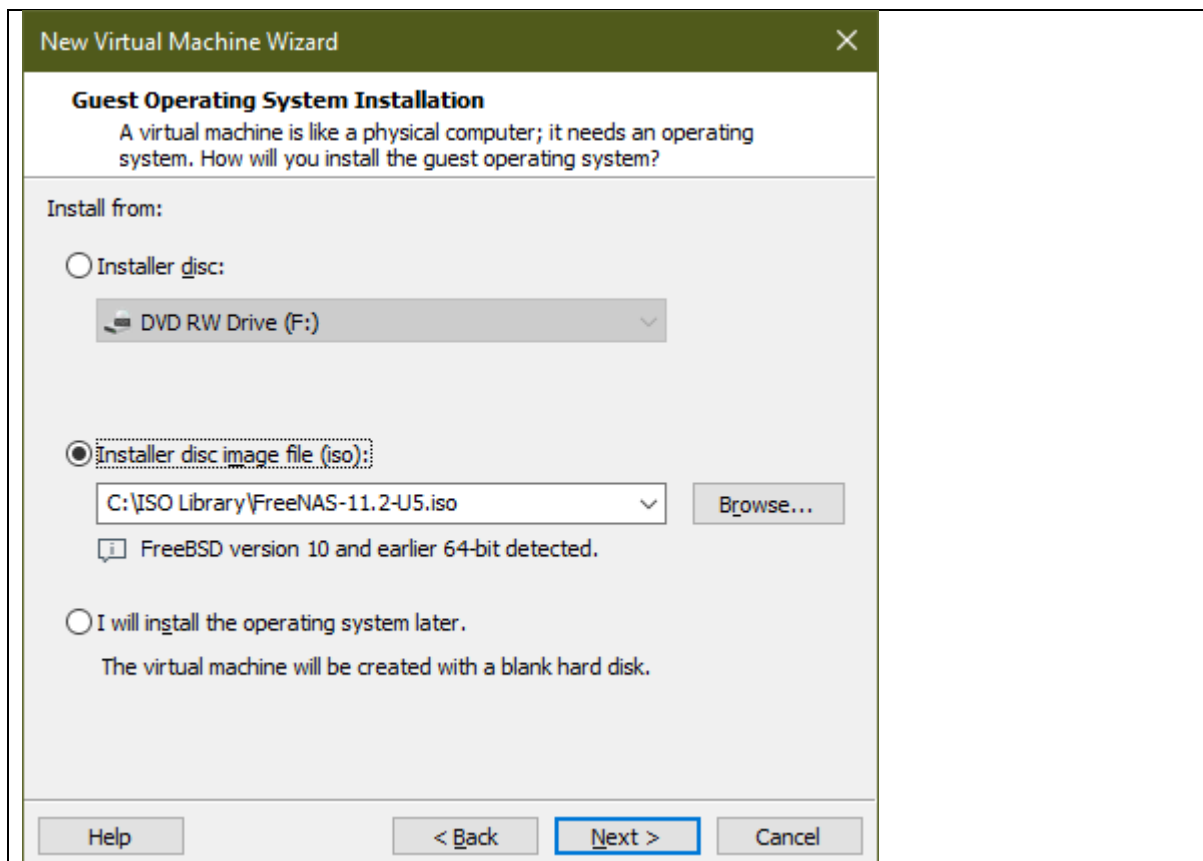

1. Gunakan opsi konfigurasi Custom

2. Gunakan compatibility Workstation 15.X

3. Gunakan ISO FreeNAS-11.2-U5 di folder ISO Library

4. Format nama VM: **FreeNAS NIM** dan buat folder **FreeNAS** di dalam **VM-NIM**

New Virtual Machine Wizard

Name the Virtual Machine
What name would you like to use for this virtual machine?

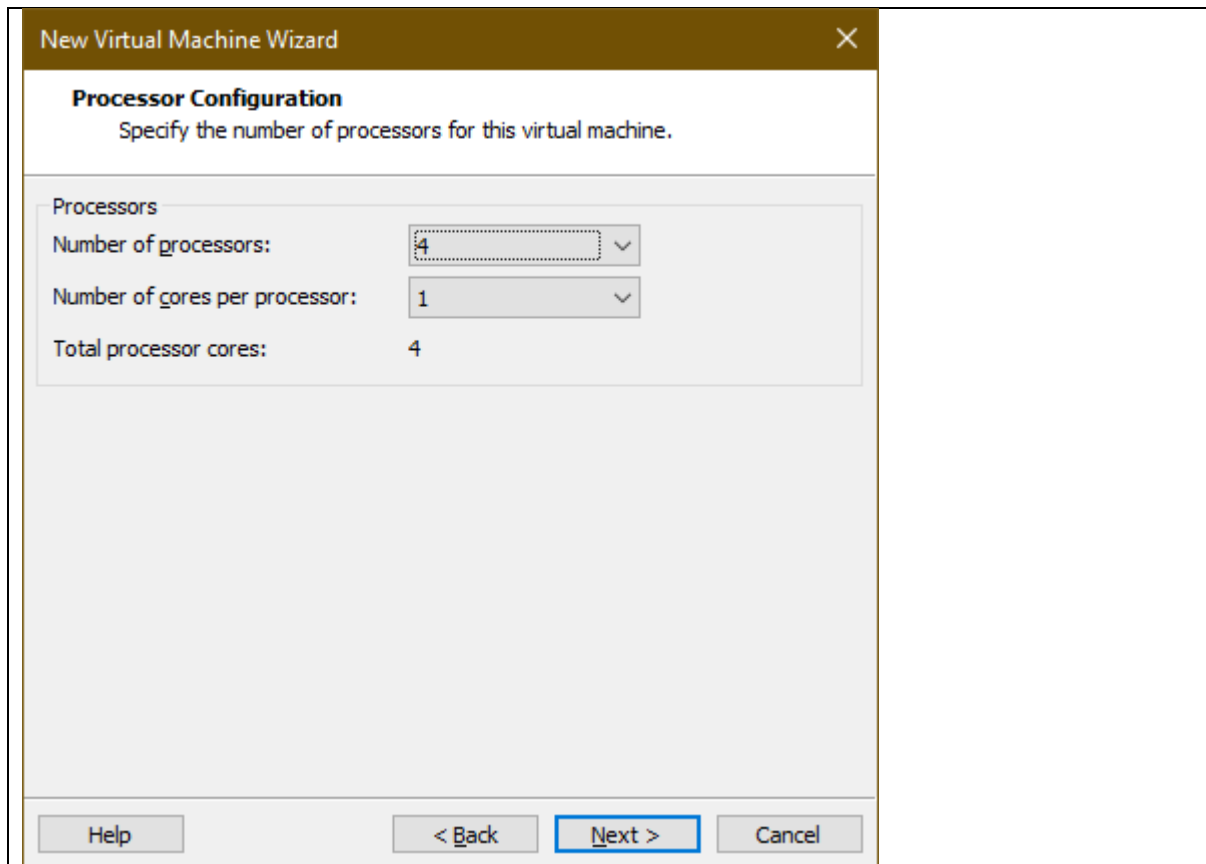

Virtual machine name:
FreeBSD version 10 and earlier 64-bit

Location:
D:\VM-123170084\FreeNAS\FreeNAS 123170084 [Browse...](#)

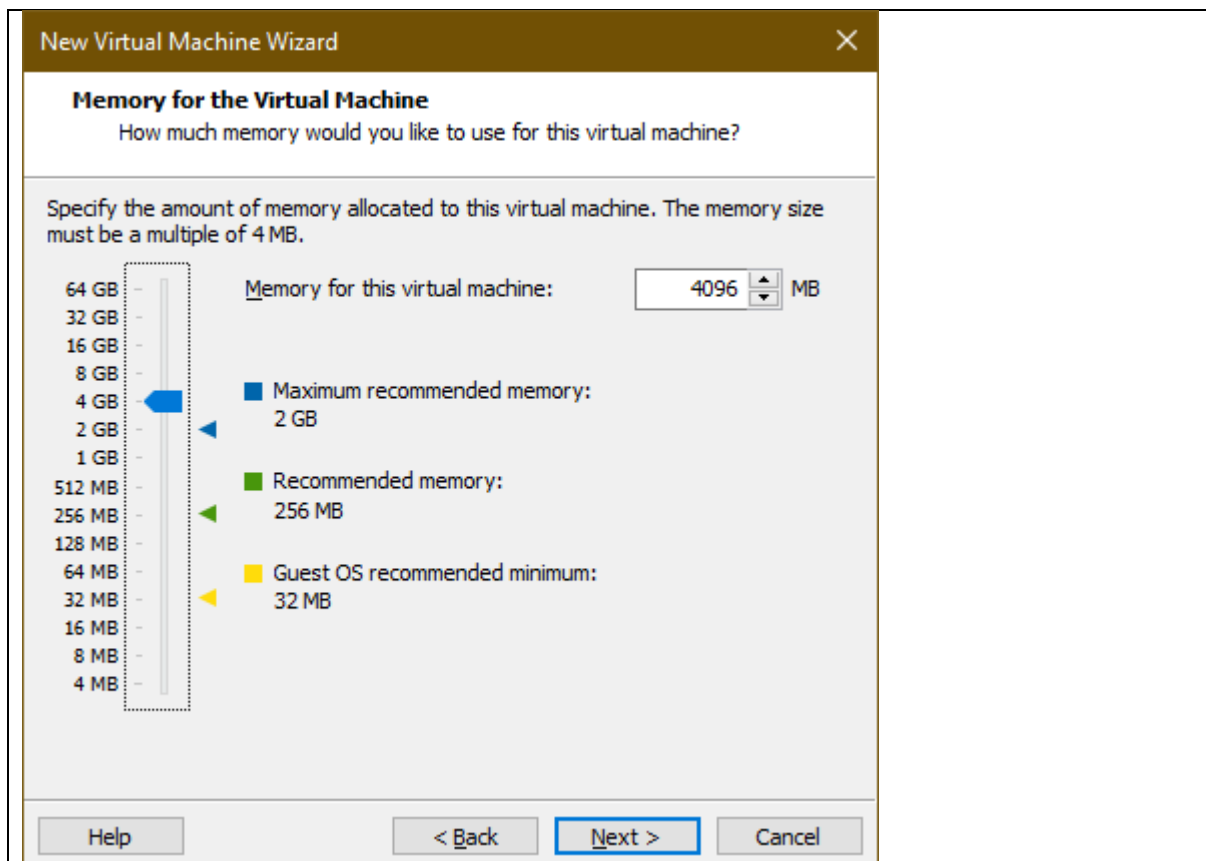

The default location can be changed at Edit > Preferences.

< Back Next > Cancel

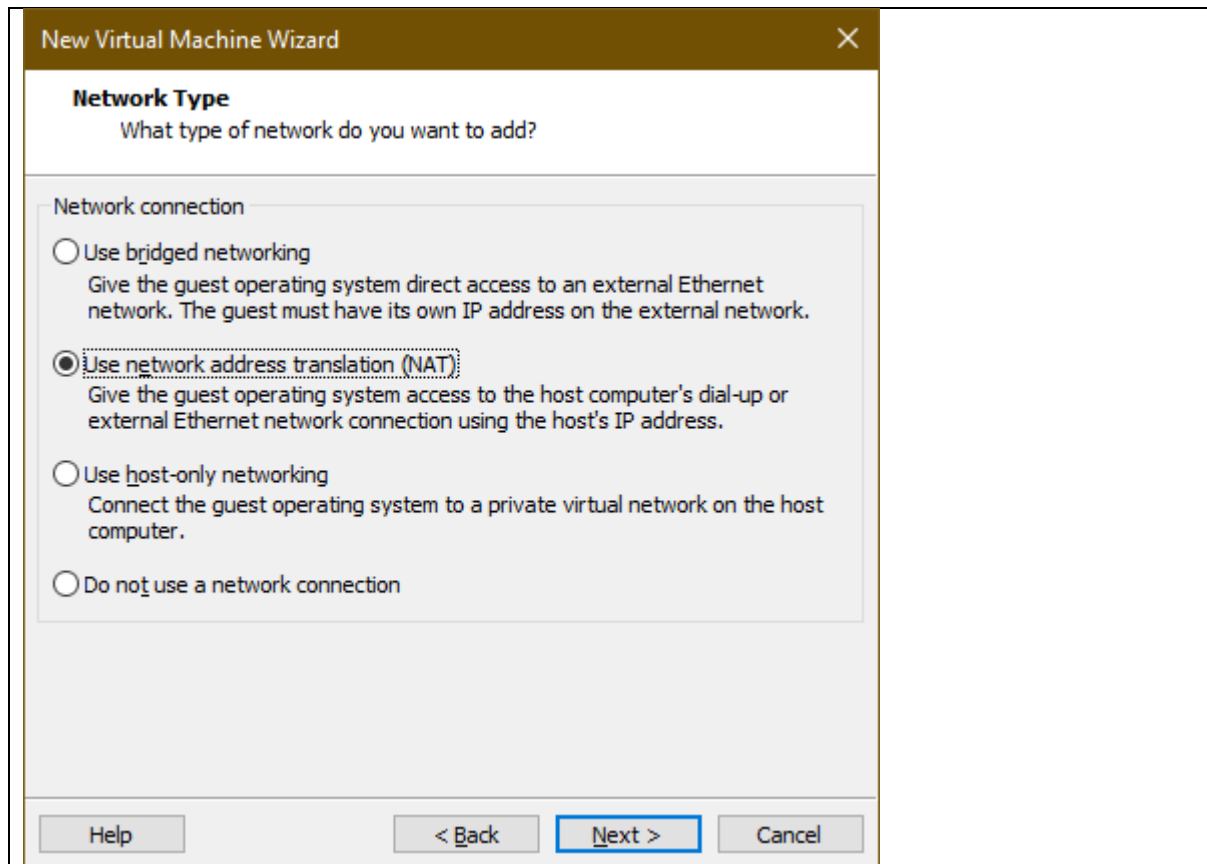

5. Gunakan 4 processor dan 1 core

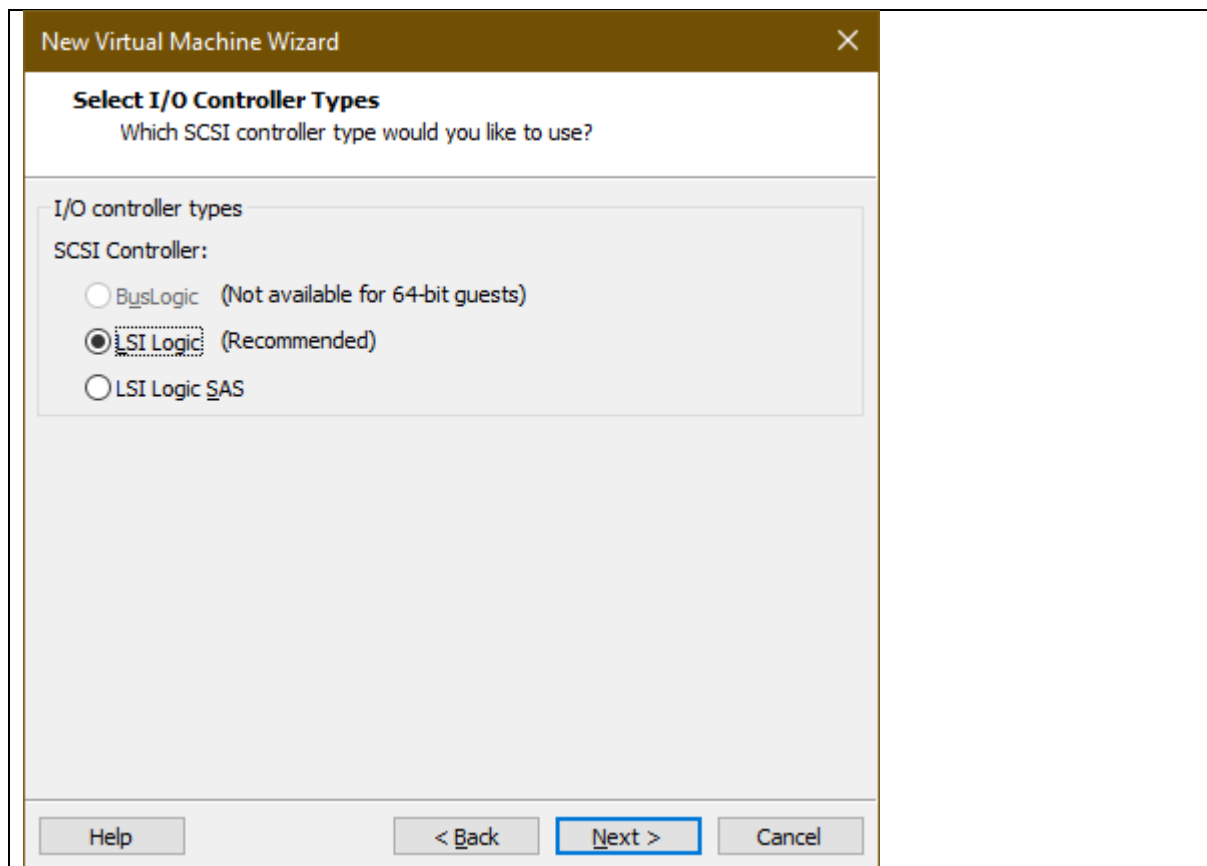

6. Gunakan RAM sebesar 4 GB

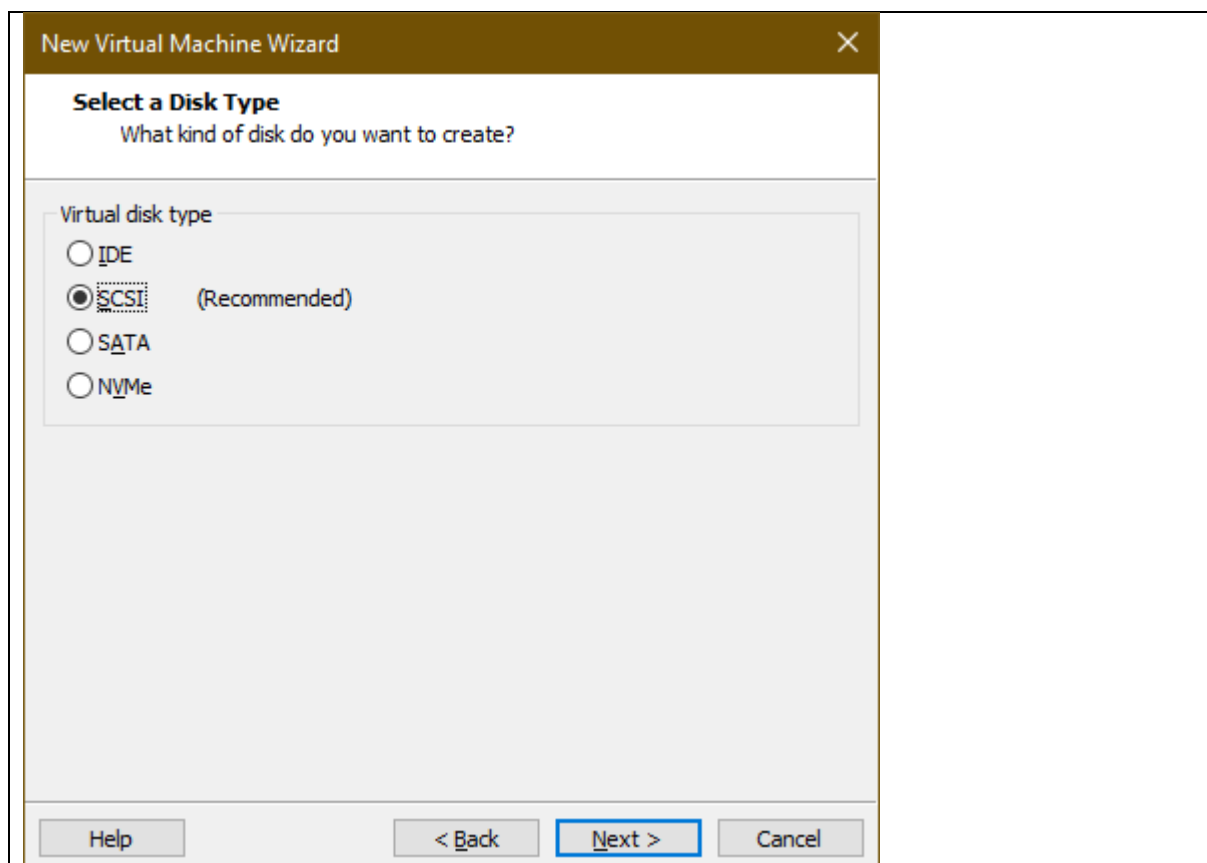

7. Gunakan mode jaringan NAT

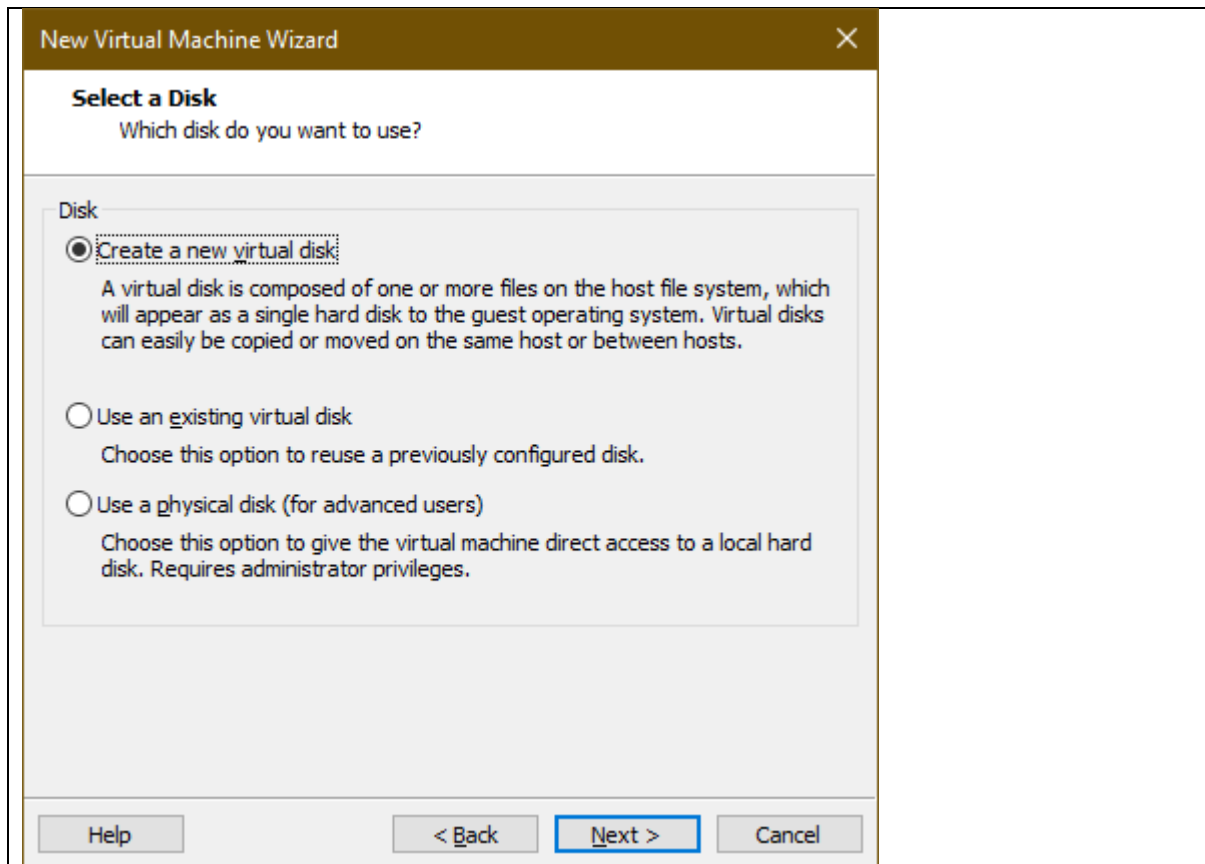

8. Gunakan pengaturan default I/O Controller

9. Gunakan pengaturan default Virtual Disk Type

10. Pilih opsi buat virtual disk baru

11. Buat disk untuk sistem sebesar 10 GB dengan mode Split dan hilangkan checklist allocate disk

The screenshot shows the 'New Virtual Machine Wizard' window, specifically the 'Specify Disk Capacity' step. The title bar reads 'New Virtual Machine Wizard' with a close button. The main heading is 'Specify Disk Capacity' with the subtitle 'How large do you want this disk to be?'. A text input field for 'Maximum disk size (GB):' contains the value '10.0'. Below this, it states 'Recommended size for FreeBSD version 10 and earlier 64-bit: 20 GB'. There are two radio button options: 'Allocate all disk space now.' (unchecked) and 'Split virtual disk into multiple files' (checked). A descriptive text explains that allocating full capacity enhances performance but requires all physical disk space, while splitting the disk makes it easier to move but may reduce performance. At the bottom, there are four buttons: 'Help', '< Back', 'Next >', and 'Cancel'.

New Virtual Machine Wizard

Specify Disk Capacity
How large do you want this disk to be?

Maximum disk size (GB):

Recommended size for FreeBSD version 10 and earlier 64-bit: 20 GB

☐ Allocate all disk space now.
Allocating the full capacity can enhance performance but requires all of the physical disk space to be available right now. If you do not allocate all the space now, the virtual disk starts small and grows as you add data to it.

☐ Store virtual disk as a single file

☒ Split virtual disk into multiple files
Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.

Help < Back Next > Cancel

12. Gunakan pengaturan default untuk nama disk

The screenshot shows the 'New Virtual Machine Wizard' window, specifically the 'Specify Disk File' step. The title bar reads 'New Virtual Machine Wizard' with a close button. The main heading is 'Specify Disk File' with the subtitle 'Where would you like to store the disk file?'. A section titled 'Disk file' contains the text: 'A 10 GB virtual disk be created using multiple disk files. The disk files will be automatically named based on this file name.' Below this text is a text input field containing the default filename 'FreeBSD version 10 and earlier 64-bit.vmdk' and a 'Browse...' button. At the bottom, there are four buttons: 'Help', '< Back', 'Next >', and 'Cancel'.

New Virtual Machine Wizard

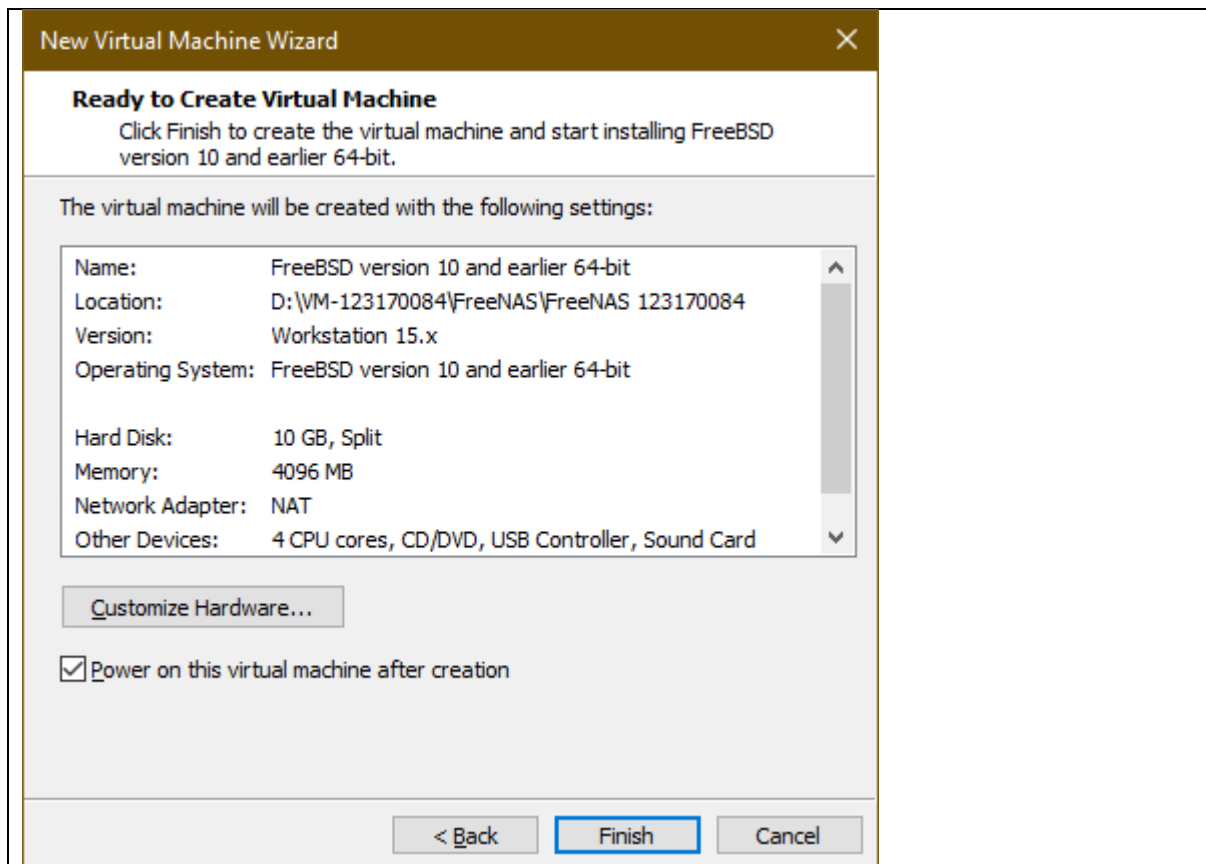

Specify Disk File
Where would you like to store the disk file?

Disk file
A 10 GB virtual disk be created using multiple disk files. The disk files will be automatically named based on this file name.

Help < Back Next > Cancel

13. Tampilkan tangkapan layar dari ringkasan konfigurasi Virtual Machine (tahap akhir Wizard) lalu nyalakan VM

TUGAS BAGIAN KEDUA – INSTALASI FREENAS:

1. Tampilan awal tahap instalasi FreeNAS, pilih Install/Upgrade

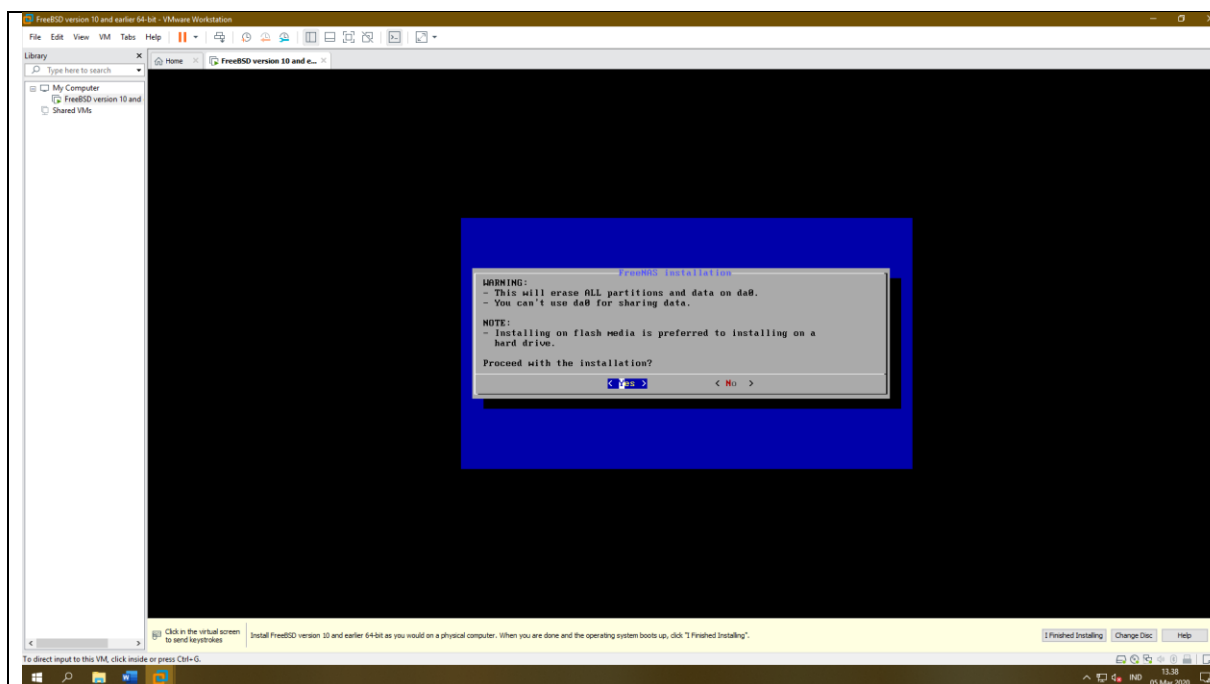

2. Tampilan warning RAM kurang dari 8GB, pilih Yes

3. Tampilan pemilihan destination media untuk dipasang FreeNAS, pilih da0

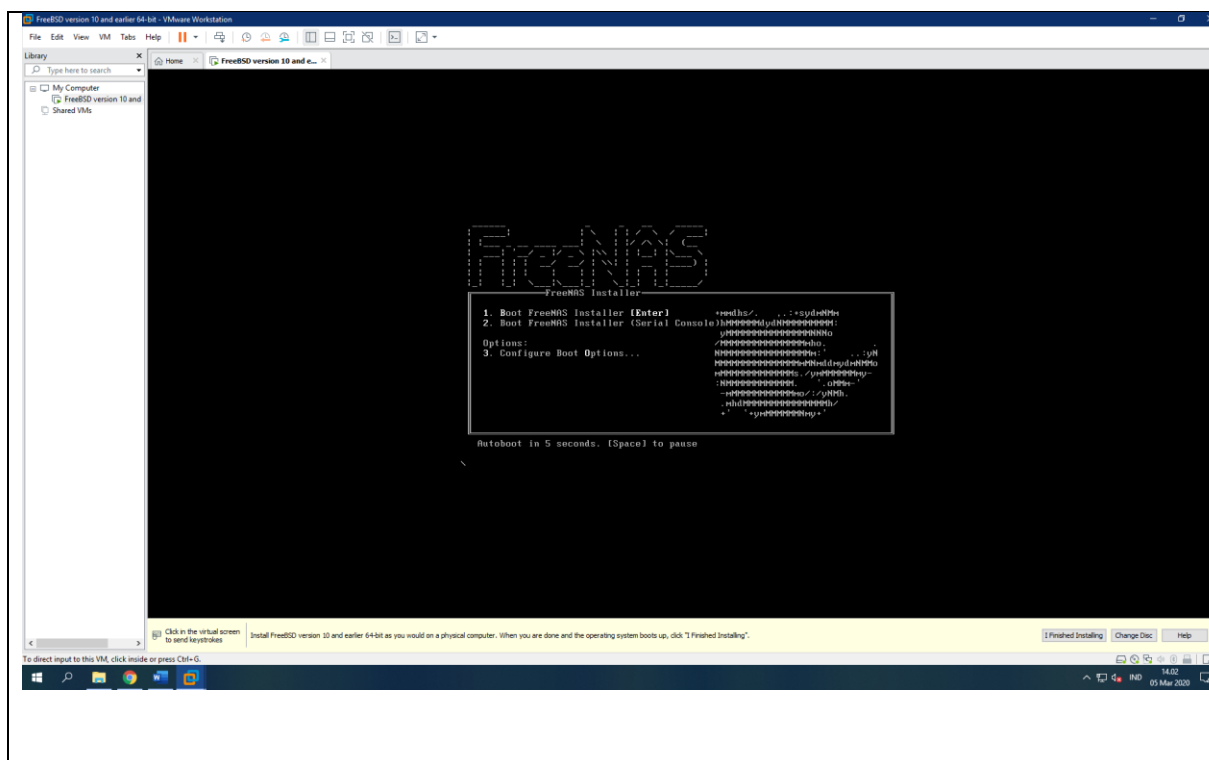

4. Tampilan konfirmasi penghapusan/format media yang terpilih, pilih Yes

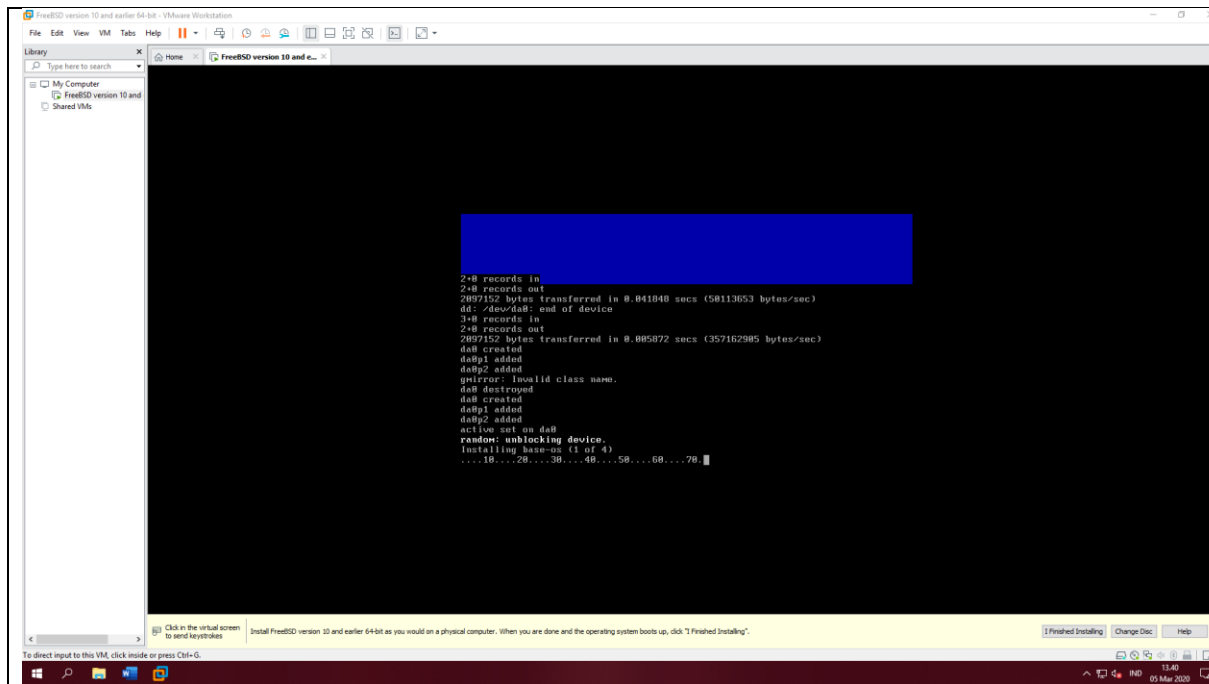

5. Tampilan pengaturan kata sandi, gunakan NIM atau bebas

6. Tampilan mode boot dari FreeNAS, pilih BIOS

7. Tampilan proses instalasi FreeNAS

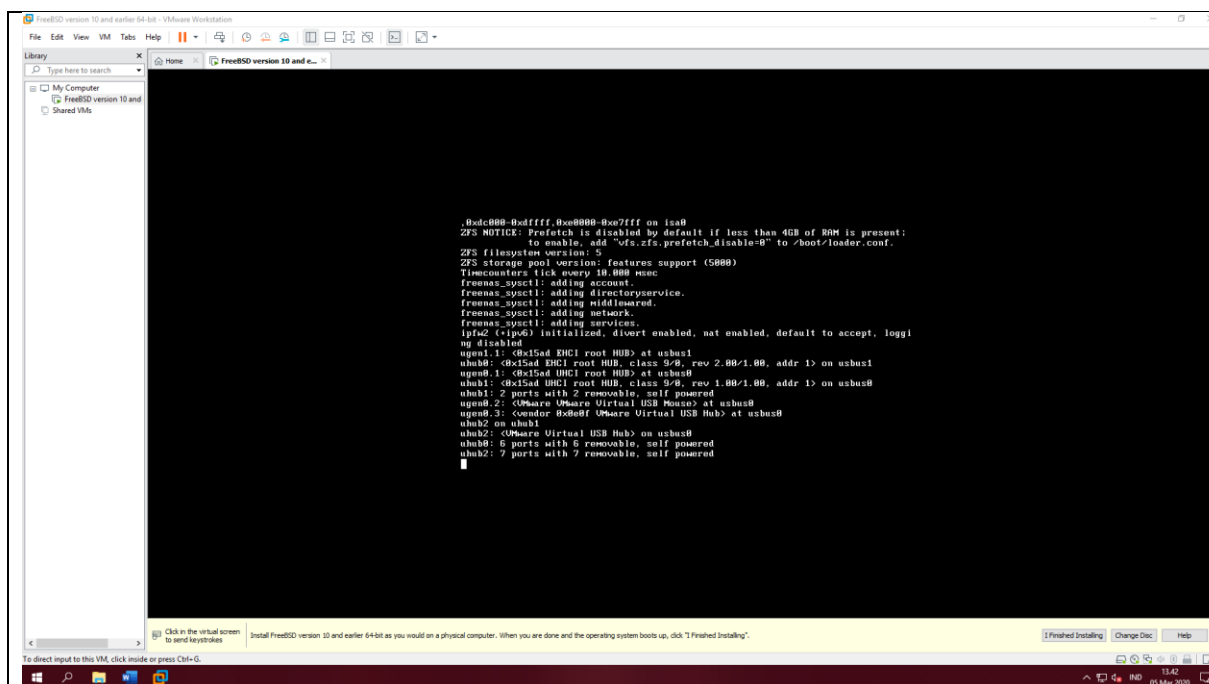

8. Tampilan hasil akhir proses instalasi FreeNAS, pilih OK kemudian pilih Reboot System

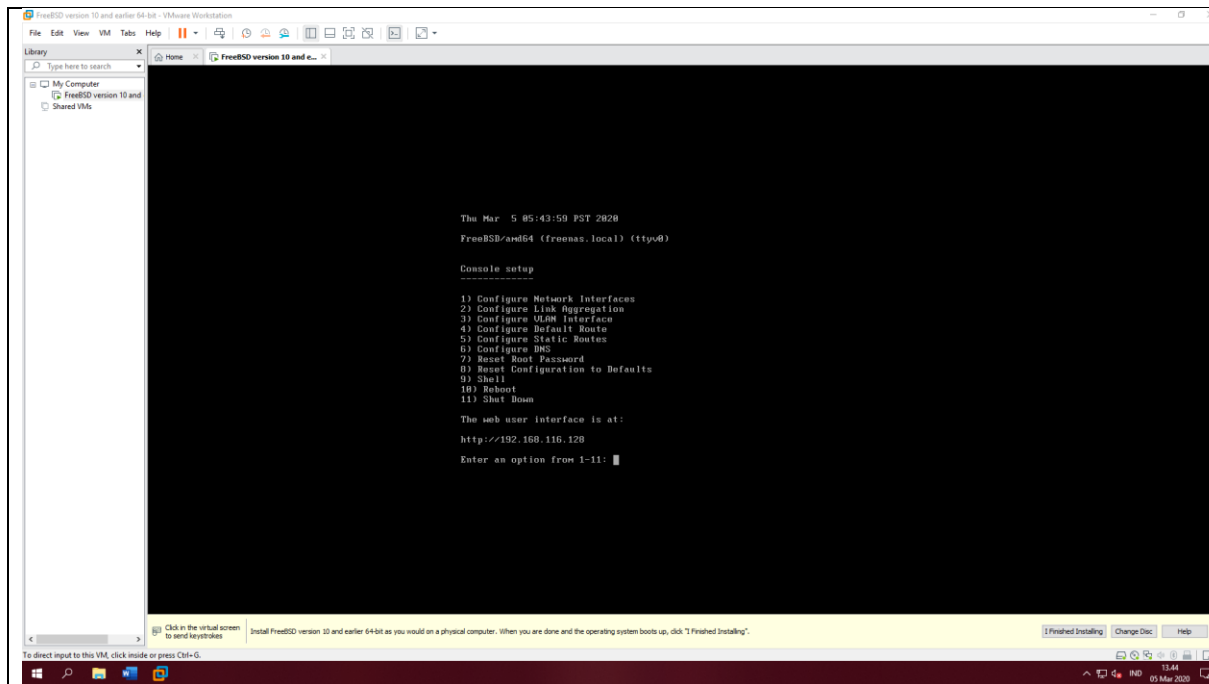

9. Tampilan proses booting menuju FreeNAS OS

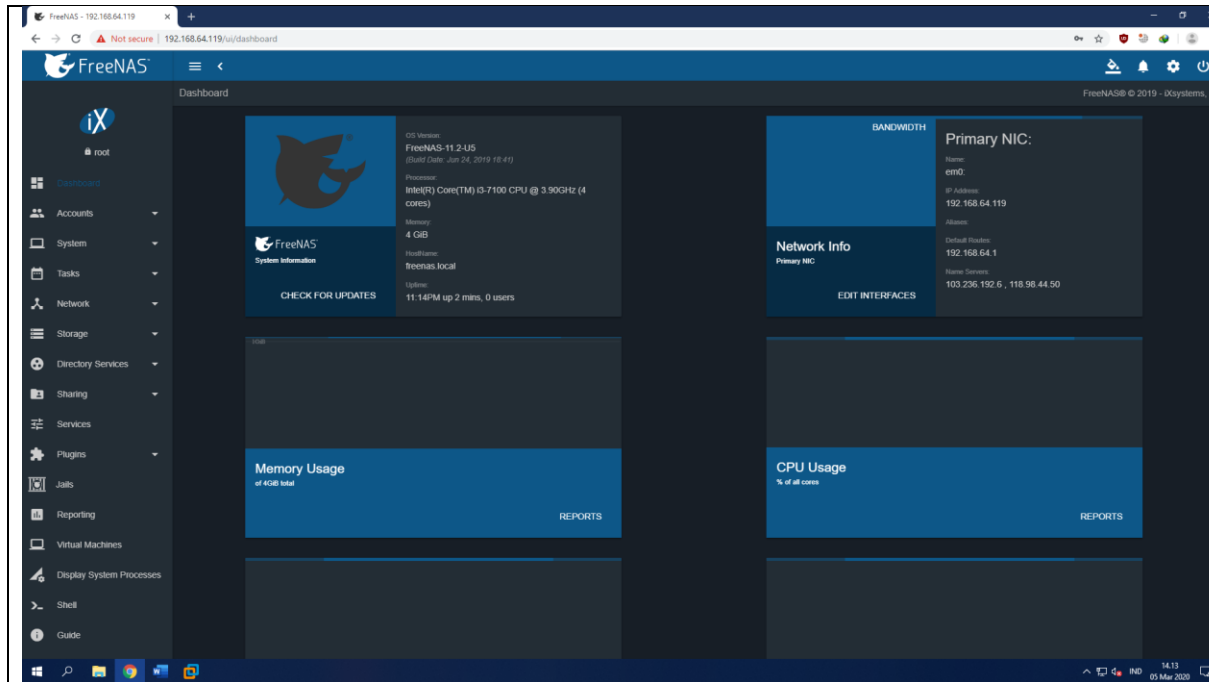

10. Tampilan hasil akhir booting yang menunjukkan Console Setup

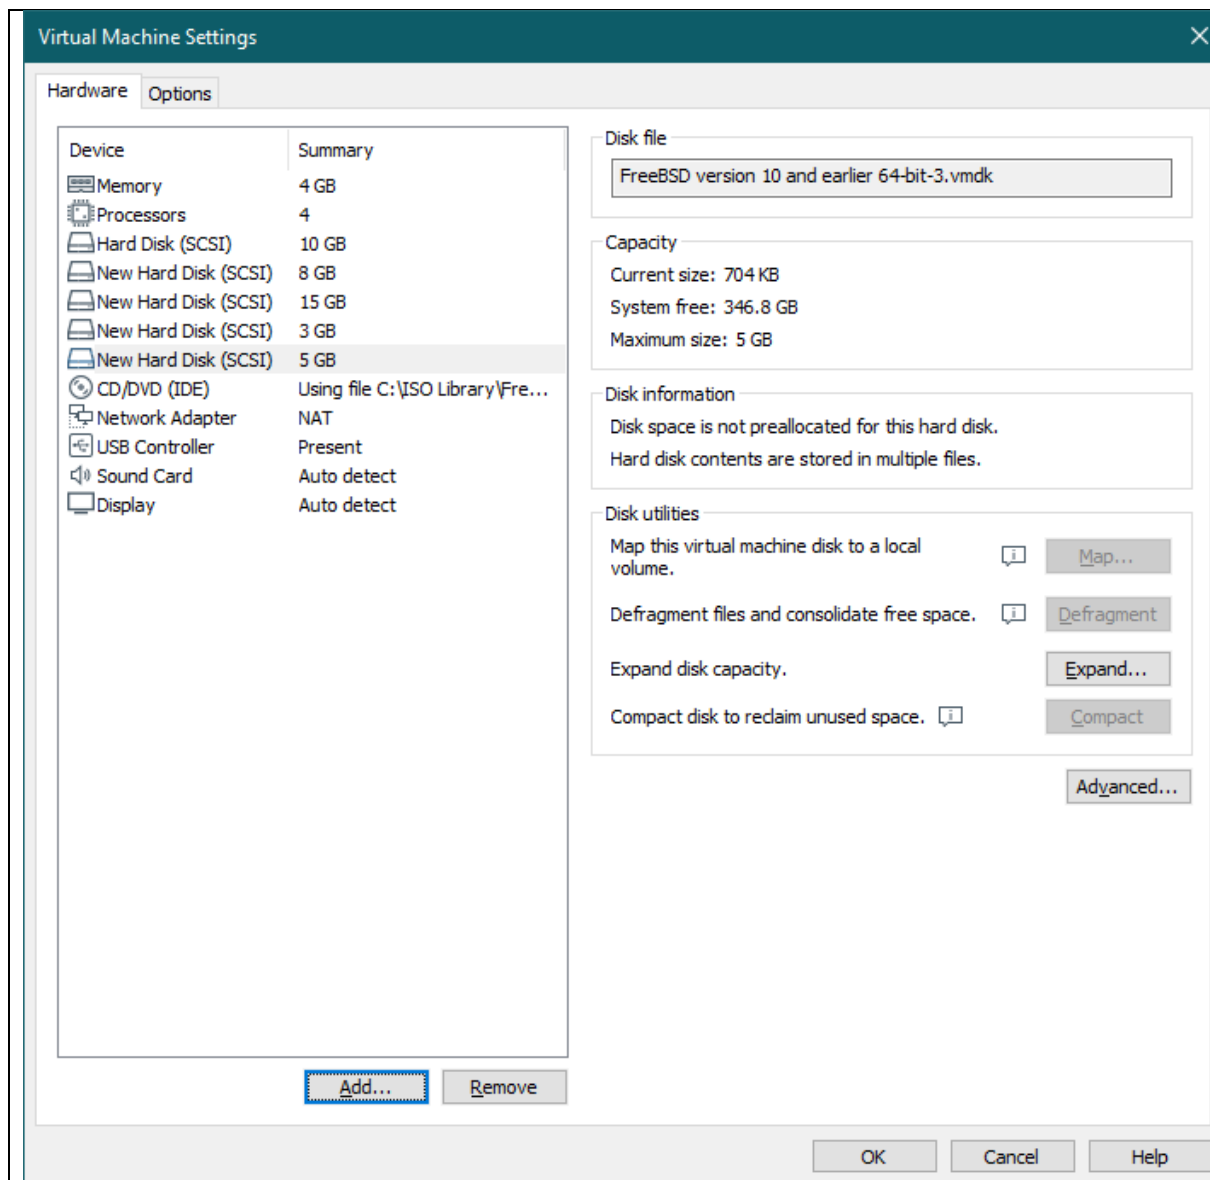

TUGAS BAGIAN KETIGA – KONFIGURASI FREENAS:

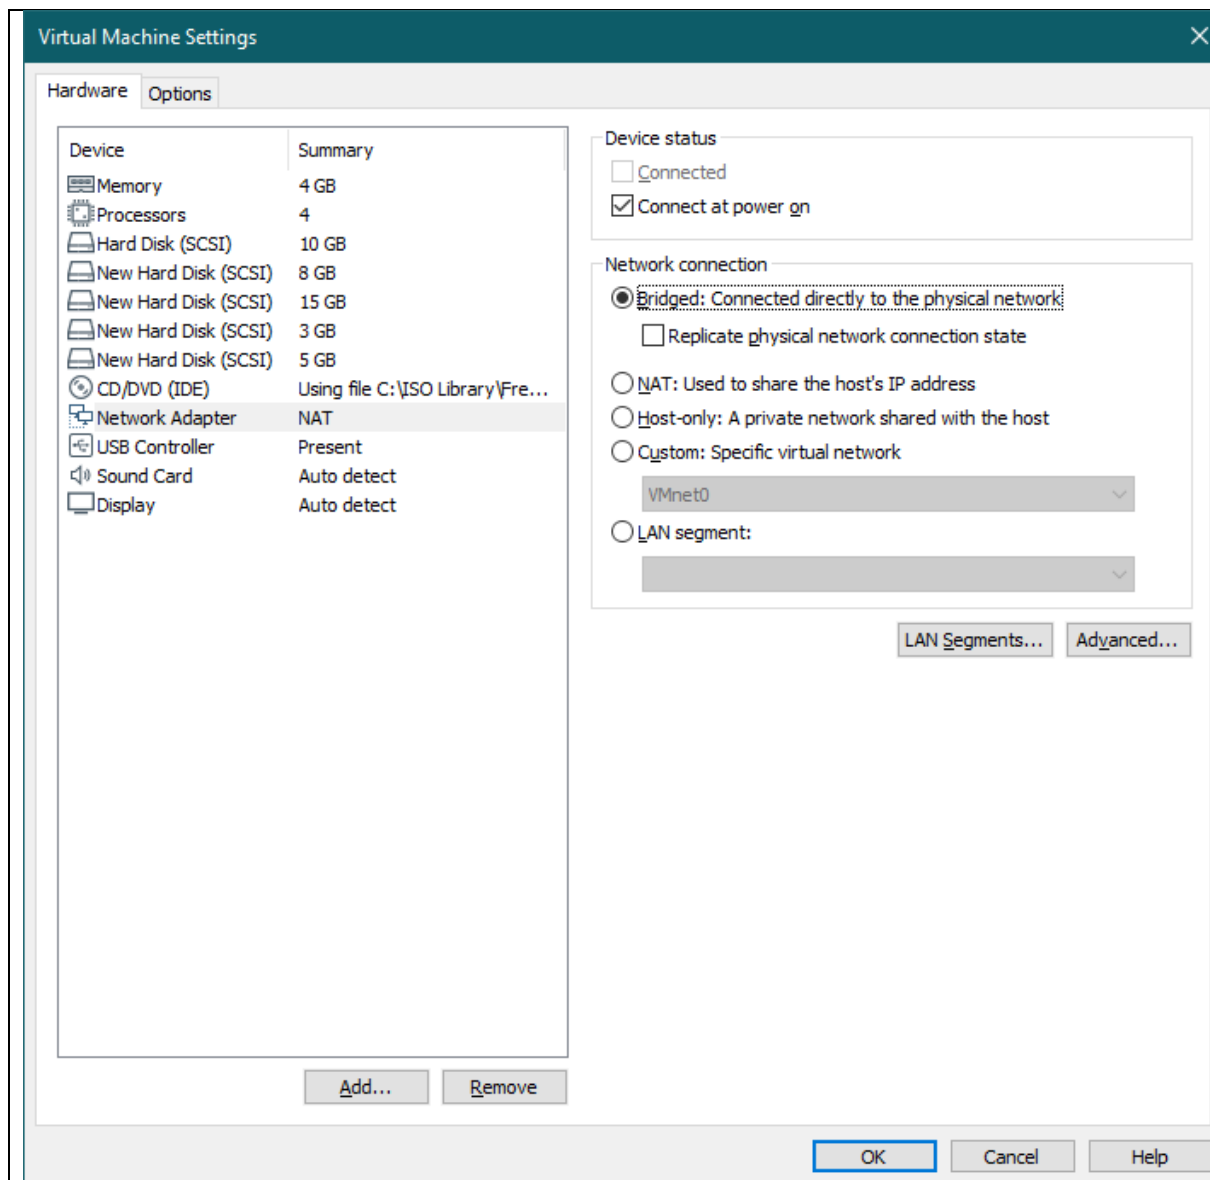

1. Tampilan dashboard setelah login FreeNAS

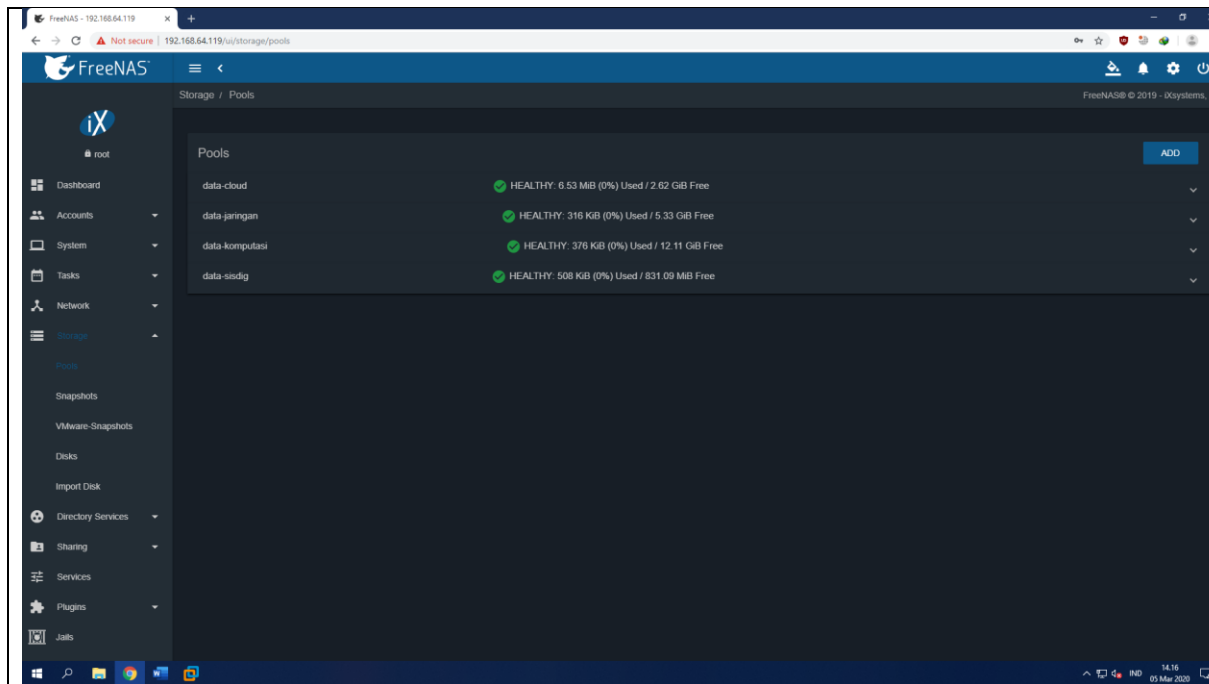

2. Tampilan konfigurasi VM pada Eksperimen #1

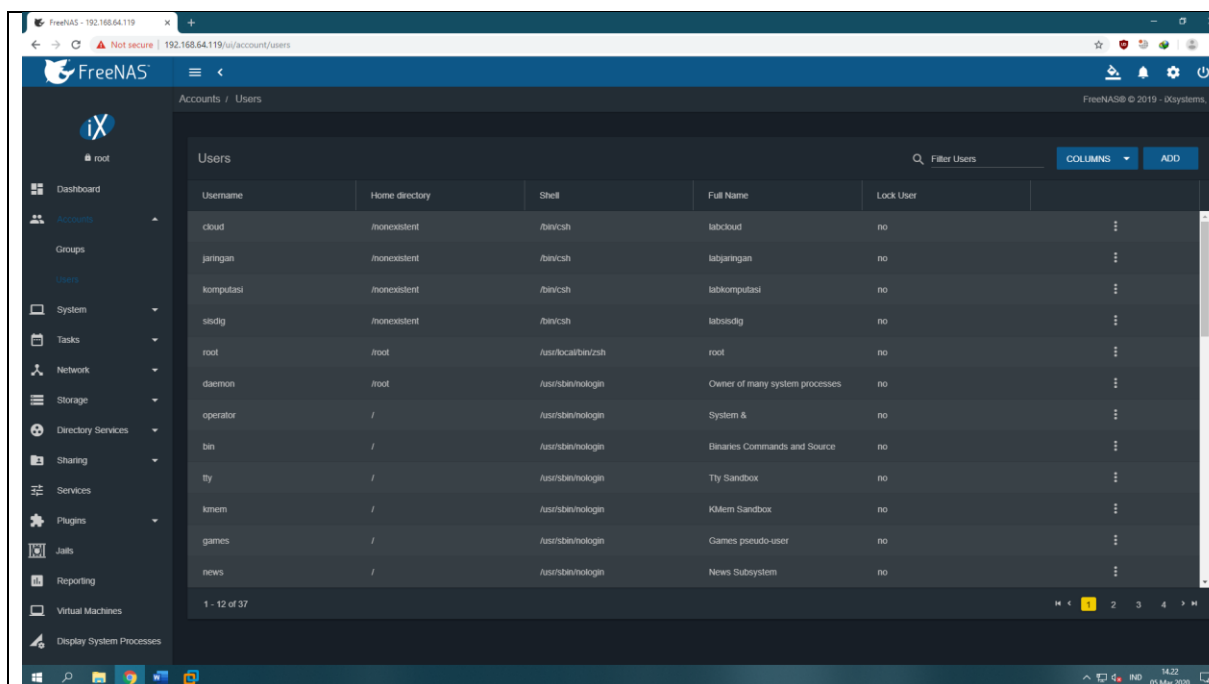

3. Tampilan IP pada dashboard Console Setup pada Eksperimen #2

4. Tampilkan hasil dari pembuatan pools tambahan pada menu Storage -> Pools

5. Tampilkan hasil dari pembuatan user tambahan pada menu Accounts -> Users

6. Tampilkan hasil dari pembuatan shares tambahan untuk 4 lab pada menu Sharing -> Windows (SMB) Shares

7. Tampilkan hasil akses shares pada Windows Explorer (hasil mapping) untuk Lab Cloud (yang pertama kali dibuat)

8. Tampilkan hasil akses shares untuk Lab Jaringan

9. Tampilkan hasil akses shares untuk Lab Komputasi

10. Tampilkan hasil akses shares untuk Lab Sisdig

DOKUMENTASI PERTEMUAN KELIMA (BILA ADA)
