Nama : Isnan Rizqi Kurniawan

NIM : 123170041

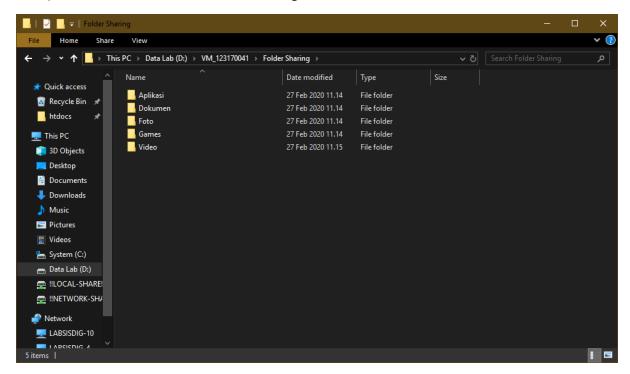

#### **DOKUMENTASI**

1. SAMBA - LOCAL FILE SHARING

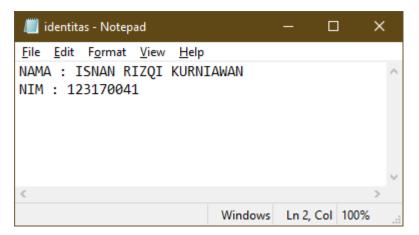

a) Buat folder "Folder Sharing"

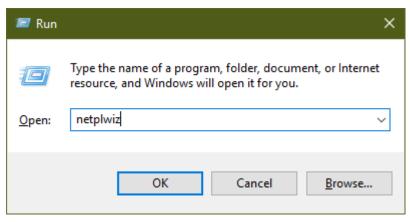

b) Buat dokumen didalam "Folder Sharing"

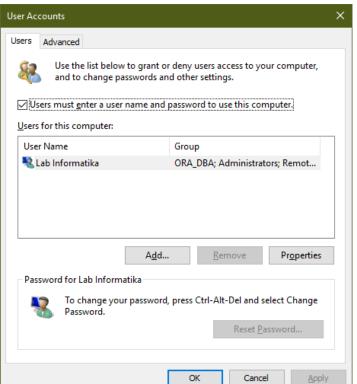

c) Buat dokumen notepad di folder "Dokumen" bernama "identitas" yang berisi nama dan nim

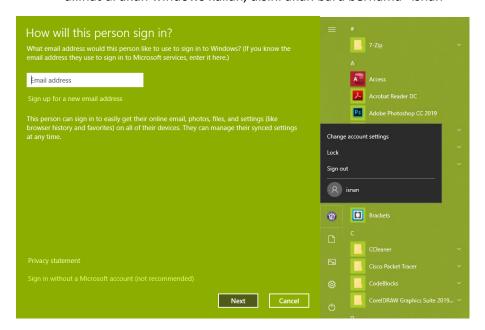

d) Membuat akun

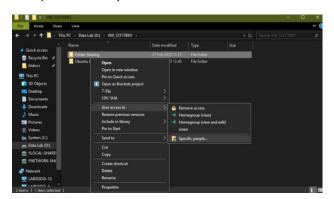

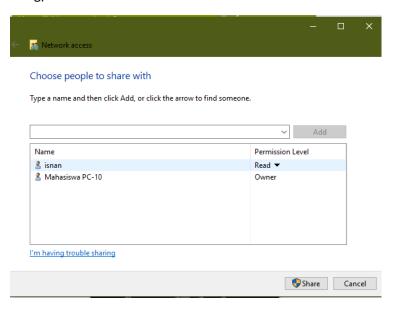

e) Membuat akun local dengan sign in without a microsoft account, ketika berhasil akan dapat dilihat di akun windows kalian, disini akun baru bernama "isnan"

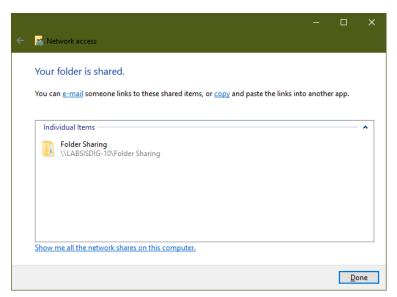

f) Memulai pilih akses

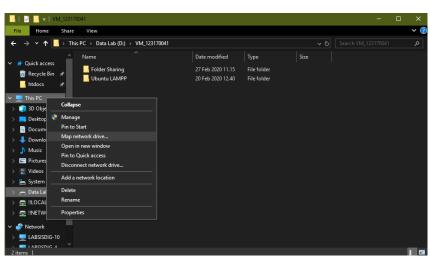

g) Masukan user

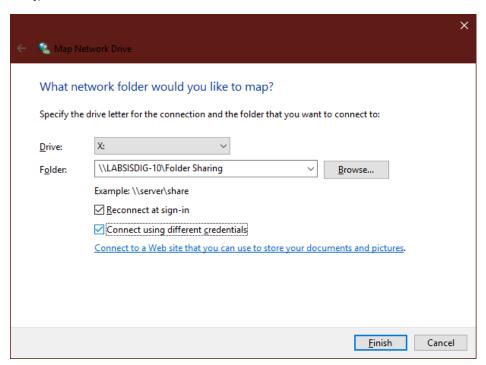

## h) Copy url akses

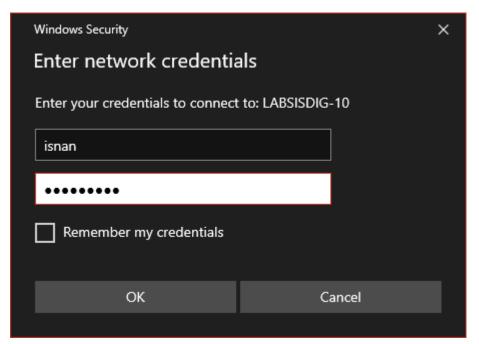

# i) Map network drive

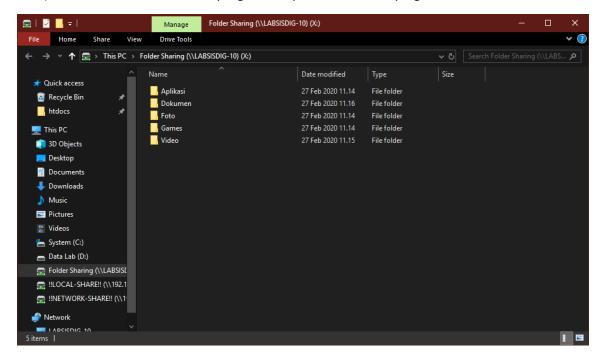

#### j) Masukan URL tadi

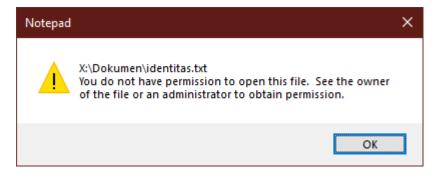

## k) Masukan user pass akses

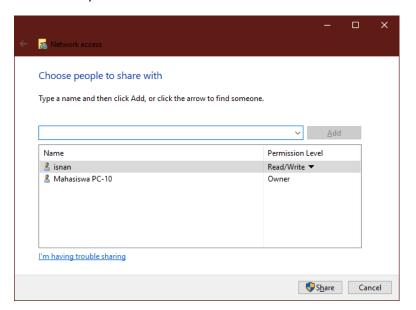

I) Akan muncul folder baru yang tadi, dapat dilihat di samping kiri

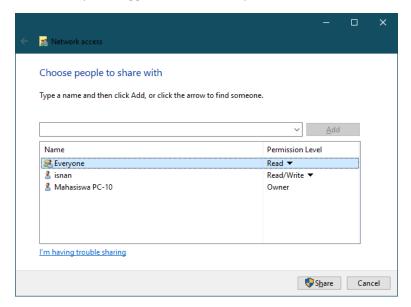

m) Hanya read saja jadi tidak dapat mengubah apapun dari file

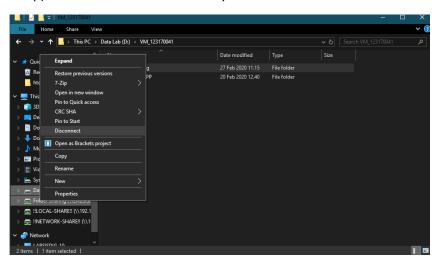

n) Untuk dapat mengedit dan menambahkan file maka harus diedit pada bagian share menjadi read/write

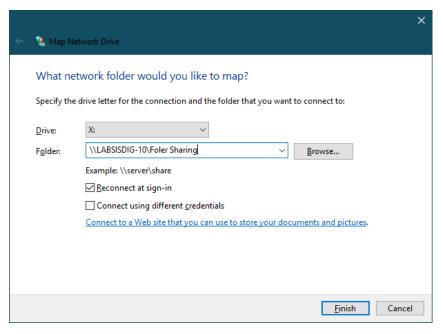

o) Experiemen dengan sharing ke semua, dengan akses everyone semua akan dapat mengakses tanpa menggunakan user dan password

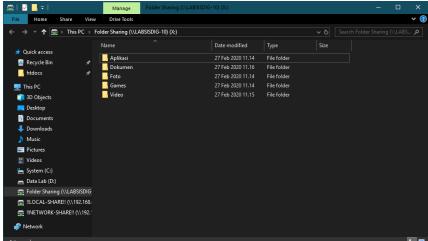

p) Disconnect akses sebelumnya

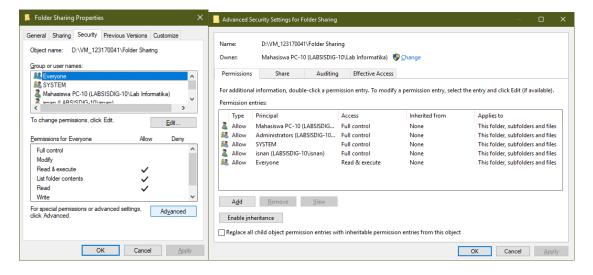

q) Maping ulang dengan menggunakan guest dengan tidak men-check bagian credentials

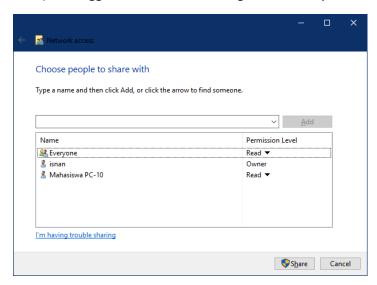

r) Mengubah kepemilikan, klik properties di folde sharing, Pada kolm owner diubah dengan nama kita

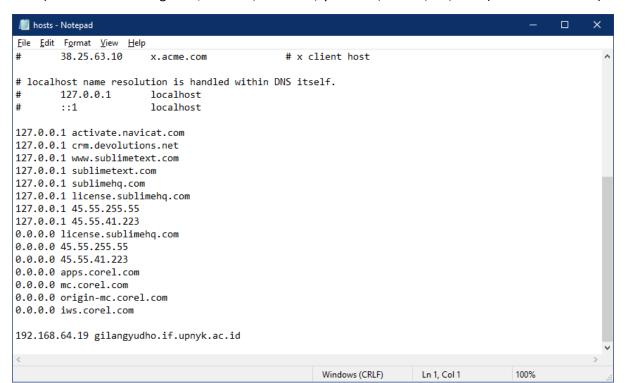

s) Mengganti LABSISDIG-10 Dengan akses hanya read

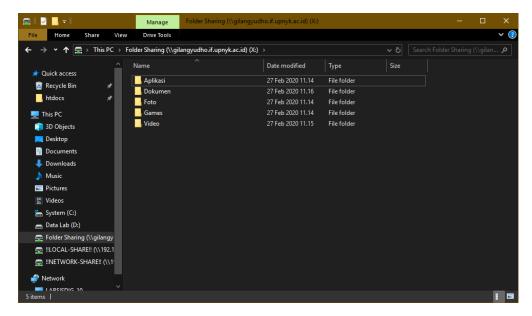

t) Maka komputer akan tidak akan bisa mengedit dan menambahkan file pada folder tsb

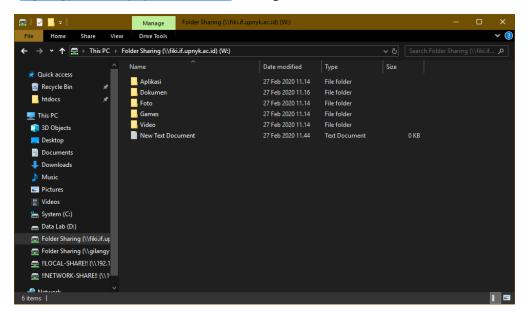

u) Membuat hosting lokal, buka C:\Windows\System32\drivers\etc\hosts (IP: 192.168.64.20)

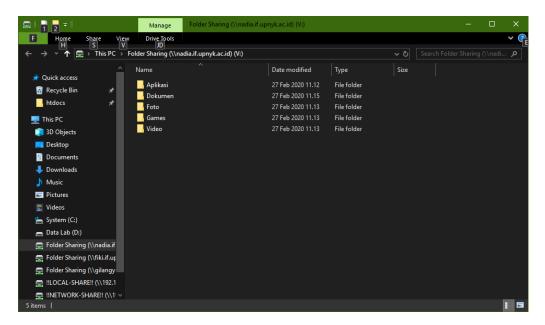

#### v) Mengakses punya teman
