Nama: Donny Ariff Galih Samodra

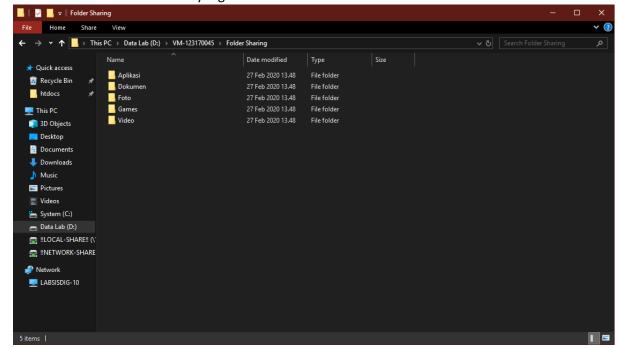

Nim: 123170045

## **Local File Sharing**

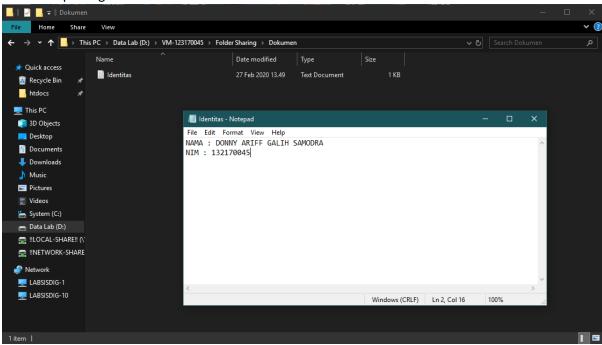

- I. Local File Sharing(SAMBA)
  - 1. buat dokumen yang akan dibagikan , di dalam volder VM-NIM buat folder dengan sama "Folder Sharing"

2. dalam folder buat 5 folder yang terdiri dari:

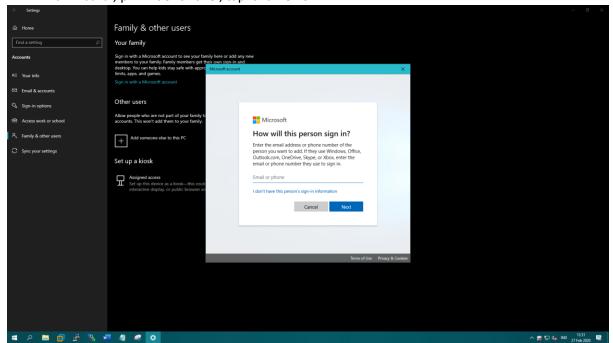

3. Buat sprti digambar bawah

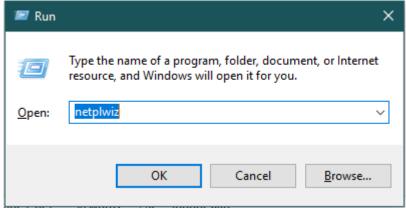

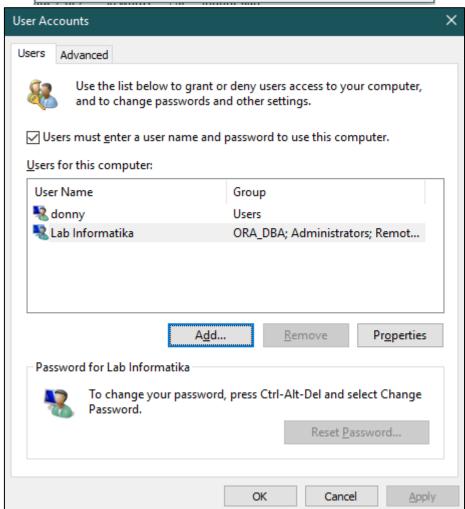

#### 4. Buat akun windws

a. baru , pilih i dont have , tapi akan error

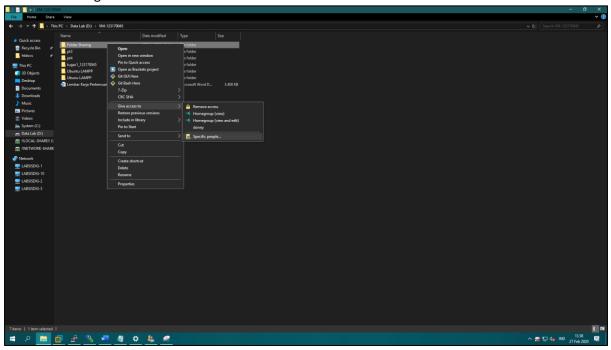

b. Jika error , Buka run (Windows+r )ketik netplwiz , add , sign in without ... , local , isikan user pass hint , finish

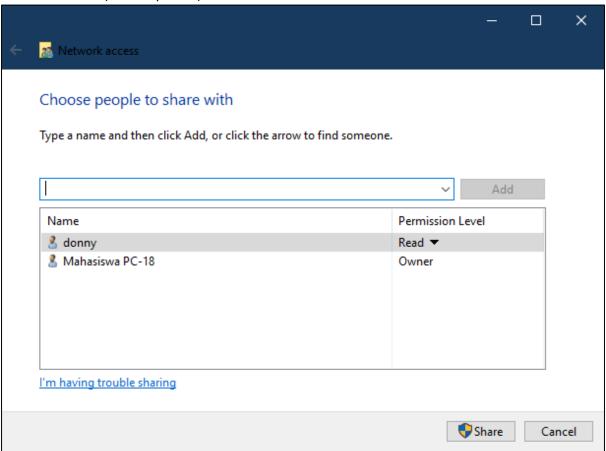

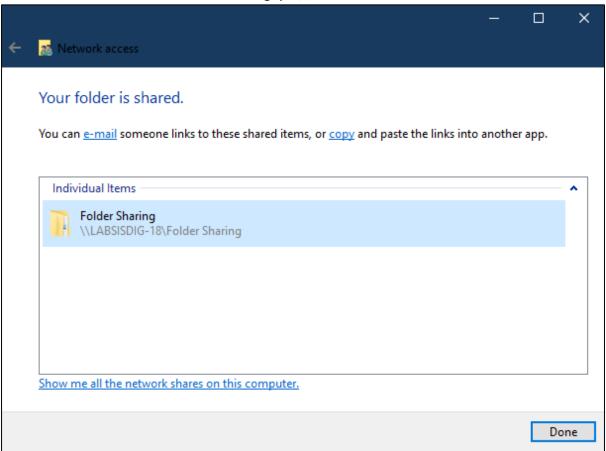

5. Cara sharing folder

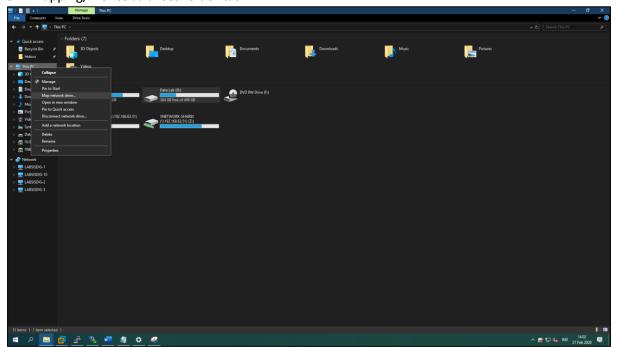

Isikan nama user (bisa dropdown) klik add

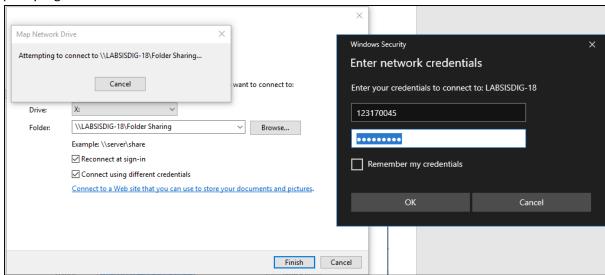

Klik share , maka akan muncul alamat sharingnya \\LAB....

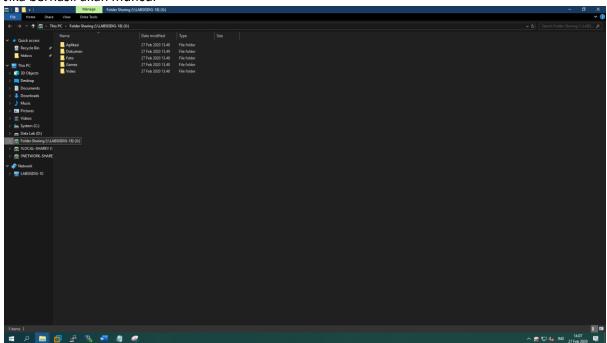

6. Mapping/mencoba akses folder tadi

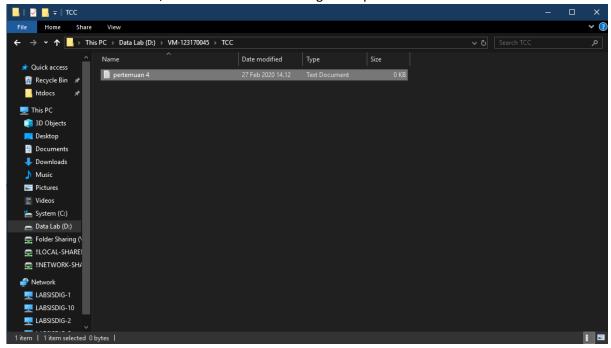

isikan alamat folder sharing tadi (  $\LAB$ ....) , centang connect .... , finish , isikan user dan pass yang td dibuat

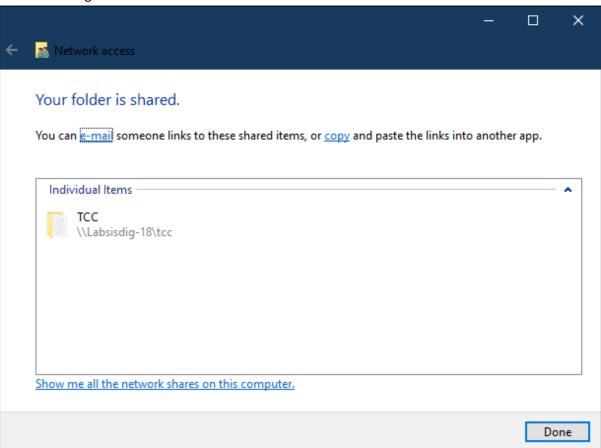

### Jika berhasil akan muncul

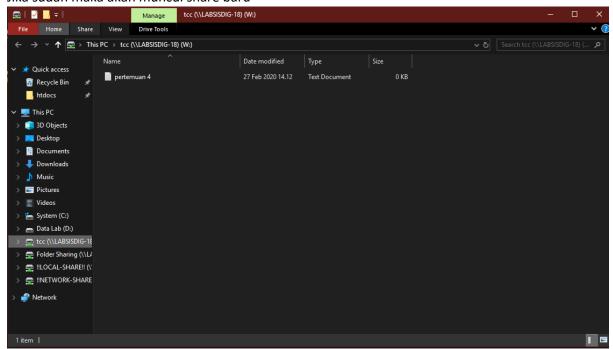

7. Buat Folder Baru TCC , kemudian buat text file dg nama pertemuan 4

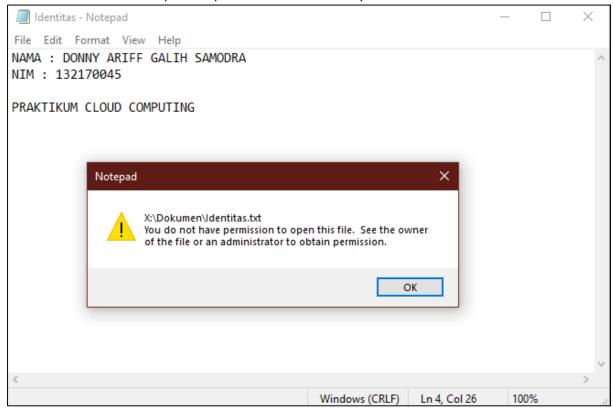

#### Share folder lagi

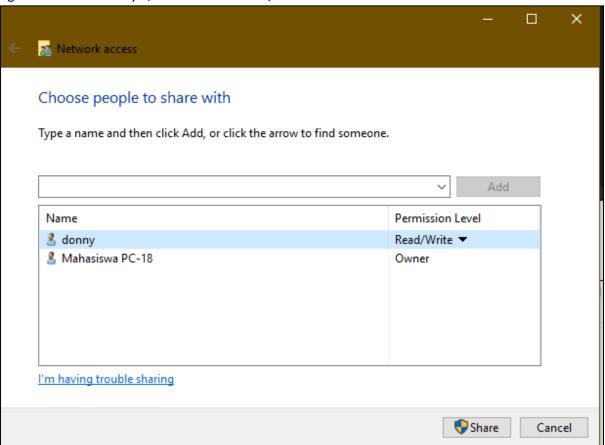

Jika sudah maka akan muncul share baru

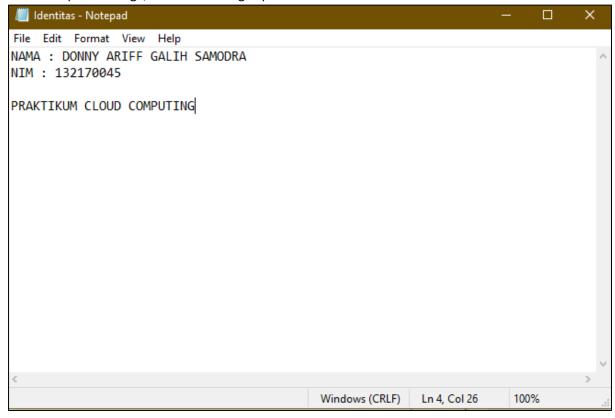

8. Masuk ke folder sharing pertama , buka file txt tadi , tambahkan kata" , simpan ditempat sama . Maka akan tidak dapa disimpan karena td share hanya "READ"

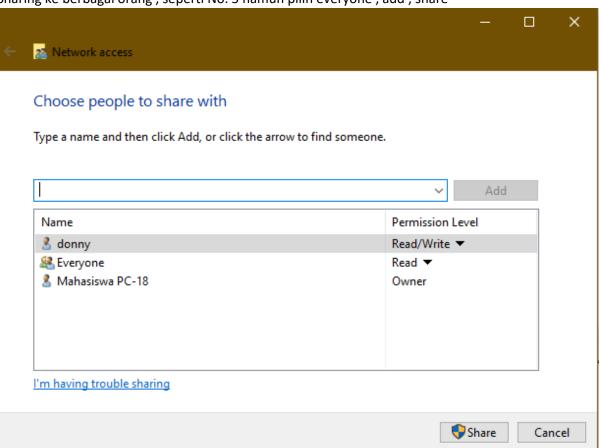

Agar bisa ubah aksesnya, ubah akses ke read/write

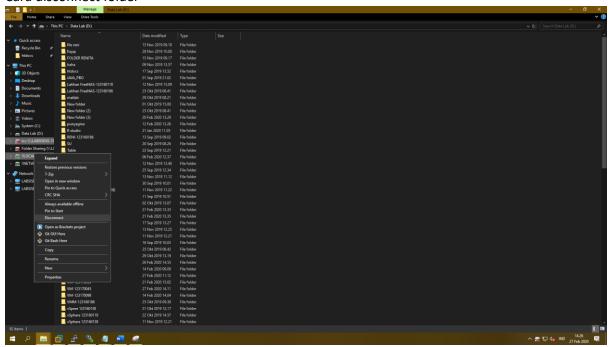

Buka notepad tadi lagi, coba save ulang seperti No. 5

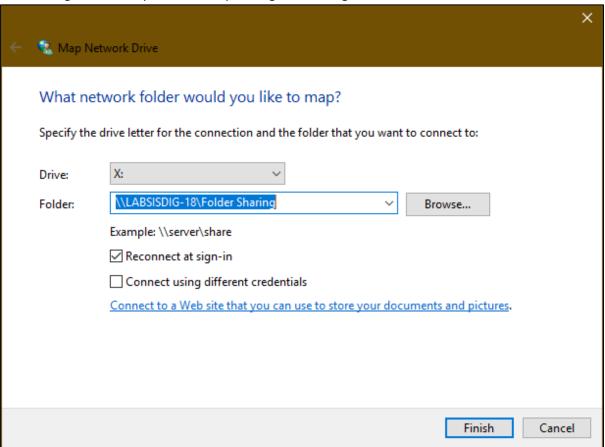

9. Sharing ke berbagai orang , seperti No. 5 namun pilih everyone , add , share

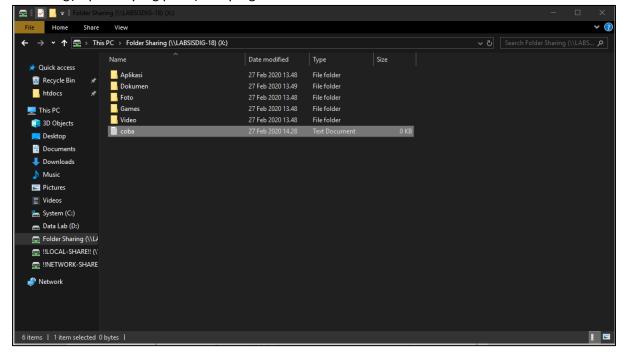

10. Cara disconnect folder

11. Akses sebagai Guest, seperti No. 6, tapi hilangkan centang connect .....

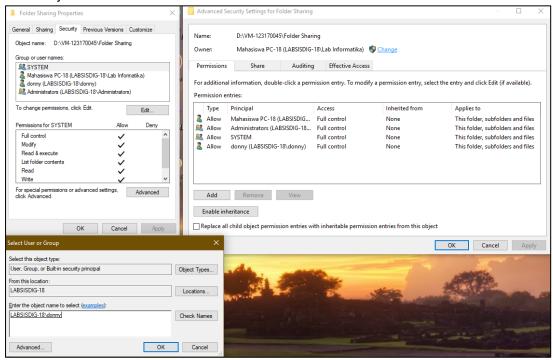

Buat folder baru di folder sharing(sebagai guest), maka akan bisa diakses karena tidak dicentang(kepilikan yang pakai) bkn yang buat

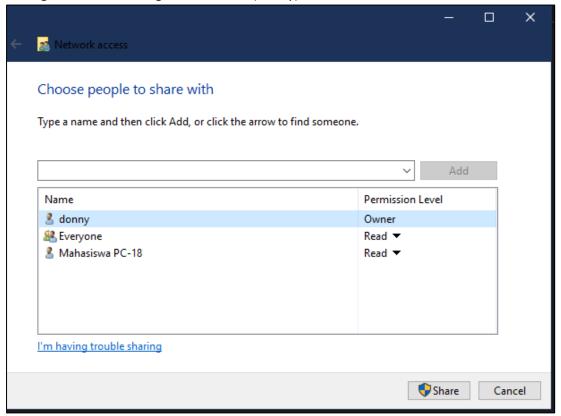

12. Ubah hak akses kepemilikan , klik kanan , properties , security , advance , pada bagian owner klik change

Isikan nama user tadi ("donny") pada (enter....) check name , maka akan otomatis berubah jika sesuai

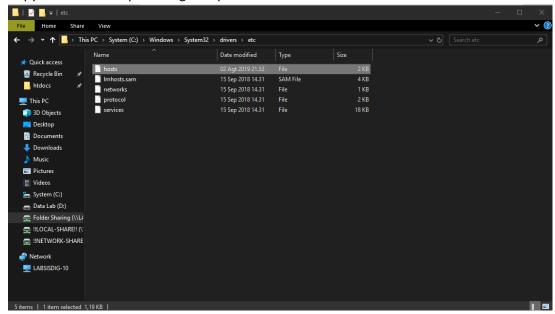

Cek lagi, maka akan menghasilkan owner(donny)

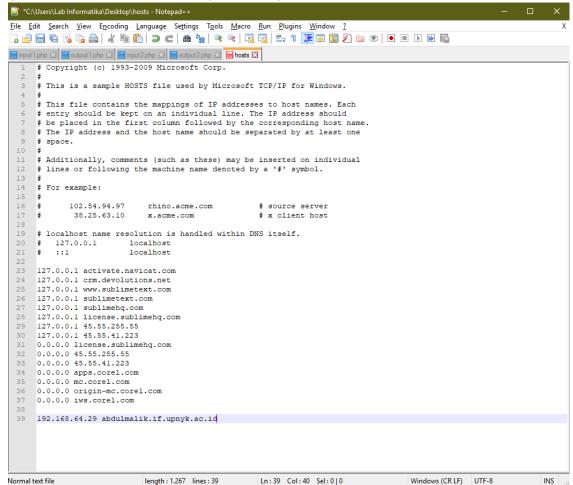

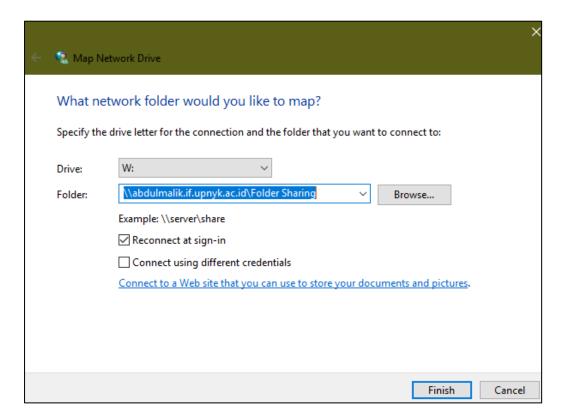

#### 13. Local dimain dengan host file

Disconnect drive mapping tadi, copy host file di C:\Windows\System32\drivers\etc Copy host ke dekstop buka dg notepad++

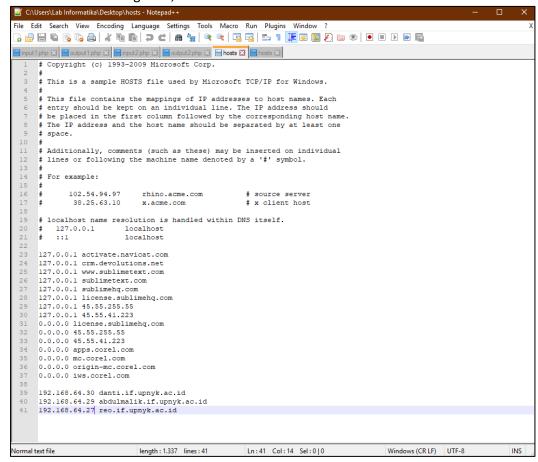

Cari ipconfig 192.168.64.XXX dg cmd (ipconfig) , berikan ke teman ip nya , dan masukan ip teman ke file host td  $\,$ , save , replace ke tmpt awal folder host

14. Ambil 3 folder sharing tmn, masukkan ke host

# Lakukan mapping lagi , dan jika berhasil akan tampil seperti ini
